Startups coexist in an evolving ecosystem with established firms to which they transfer innovativeness, technology, flexibility, and time to market speed, contributing to reinventing the business models and receiving feedback from mature firms on the current market features, the existing clients, and their unsatisfied needs. The valuation paradigms represent a central issue for any startup seeking external finance, either from family and friends or through a wider professional network. This updated book, complemented by practical cases for instance FinTechs digital platforms and e-Health applications, offers a guide to practitioners, students, and academics about the trendy valuation patterns of startups based on their strategic business planning. **New York**, 2001. *Valuation vs. Profitability: The Startup Dilemma* Vikas Devnani, 2025-06-13.
