*Predictive Modelling for Football Analytics* Leonardo Egidi, Dimitris Karlis, Ioannis Ntzoufras, 2025-11-07 Predictive Modelling for Football Analytics discusses the most well known models and the main computational tools for the football analytics domain It further introduces the footBayes R package that accompanies the reader through all the examples proposed in the book It aims to be both a practical guide and a theoretical foundation for students data scientists sports analysts and football professionals who wish to understand and apply predictive modelling in a football context Key Features Discusses various modelling strategies and predictive tools related to football analytics Introduces algorithms and computational tools to check the models make predictions and visualize the final results Showcases some guided examples through the use of the footBayes R package available on CRAN Walks the reader through the full pipeline from data collection and preprocessing through exploratory analysis and feature engineering to advanced modelling techniques and evaluation Bridges the gap between raw football data and actionable insights This text is primarily for senior undergraduates graduate students and academic researchers in the fields of mathematics statistics and computer science willing to learn about the football analytics domain Although technical in nature the book is designed to be accessible to readers with a background in statistics programming or a strong interest in sports analytics It is well suited for use in academic courses on sports analytics data science projects or professional development within football clubs agencies and media organizations

Handbook of Statistical Methods and Analyses in Sports Jim Albert, Mark E. Glickman, Tim B. Swartz, Ruud H. Koning, 2017-02-03 This handbook will provide both overviews of statistical methods in sports and in depth treatment of critical problems and challenges confronting statistical research in sports The material in the handbook will be organized by major sport baseball football hockey basketball and soccer followed by a section on other sports and general statistical design and analysis issues that are common to all sports This handbook has the potential to become the standard reference for obtaining the necessary background to conduct serious statistical analyses for sports applications and to appreciate scholarly work in this expanding area Copulae in Mathematical and Quantitative Finance Piotr Jaworski, Fabrizio Durante, Wolfgang Karl Härdle, 2013-06-18 Copulas are mathematical objects that fully capture the dependence structure among random variables and hence offer great flexibility in building multivariate stochastic models Since their introduction in the early 1950s copulas have gained considerable popularity in several fields of applied mathematics especially finance and insurance Today copulas represent a well recognized tool for market and credit models aggregation of risks and portfolio selection Historically the Gaussian copula model has been one of the most common models in credit risk However the recent financial crisis has underlined its limitations and drawbacks In fact despite their simplicity Gaussian copula models severely underestimate the risk of the occurrence of joint extreme events Recent theoretical investigations have put new tools for detecting and estimating dependence and risk like tail dependence time varying models etc in the spotlight All such

investigations need to be further developed and promoted a goal this book pursues The book includes surveys that provide an up to date account of essential aspects of copula models in quantitative finance as well as the extended versions of talks selected from papers presented at the workshop in Cracow Machine Learning and Data Mining for Sports Analytics Hugo Rios-Neto, Pieter Robberechts, Maaike Van Roy, Albrecht Zimmermann, 2026-01-27 This book constitutes the refereed proceedings of the 12th International Workshop on Machine Learning and Data Mining for Sports Analytics MLSA 2025 held in Porto Portugal on September 15 2025 The 11 full papers presented in this volume were carefully reviewed and selected from 24 submissions They are grouped into the following topics Individual sports Soccer Other team sports Statistical Thinking in Sports Jim Albert, Ruud H.
