*Metaphysics* Stephen Mumford, 2012-08-30 Metaphysics is one of the traditional four main branches of philosophy alongside ethics logic and epistemology It is also an area that continues to attract and hold a fascination for many people yet it is associated with being complex and abstract For some it is associated with the mystical or religious For others it is known through the metaphysical poets who talk of love and spirituality This Very Short Introduction goes right to the heart of the matter getting to the basic and most important questions of metaphysical thought in order to understand the theory What are objects Do colours and shapes have some form of existence What is it for one thing to cause another rather than just being associated with it What is possible Does time pass By using these questions to initiate thought about the basic issues around substance properties changes causes possibilities time personal identity nothingness and emergentism Stephen Mumford provides a clear and simple path through this analytical tradition at the core of philosophical thought

*Introduction to Metaphysics* Jean Grondin, 2012-01-31 Jean Grondin completes the first history of metaphysics and respects both the analytical and the Continental schools while transcending the theoretical limitations of each He reviews seminal texts by Parmenides Plato Aristotle Plotinus and Augustine He follows the theological turn in the metaphysical thought of Avicenna Anselm Aquinas and Duns Scotus and he revisits Descartes and the cogito Spinoza and Leibniz's

rationalist approaches Kant's reclaiming of the metaphysical tradition and post-Kantian practice up to Hegel. He engages with twentieth-century innovations that upended the discipline, particularly Heidegger's revival of the question of Being and the rediscovery of the metaphysics of existence by Sartre and the Existentialists' language by Gadamer and Derrida, and transcendence by Levinas. Metaphysics is often dismissed as a form or epoch of philosophy that must be overcome yet by promoting a full understanding of its platform and processes. Grondin reveals its cogent approach to reality and foundational influence on modern philosophy and science. By restoring the value of metaphysics for contemporary audiences, Grondin showcases the rich currents and countercurrents of metaphysical thought and its future possibilities.

**An Elementary Christian Metaphysics** Joseph Owens, 1985. Joseph Owens presents an introduction to metaphysics designed to develop in the reader a habitus of thinking. Using original Thomistic texts and Etienne Gilson's interpretation of St. Thomas Aquinas, Owens examines the application of metaphysical principles to the issues that arise in a specifically Christian environment. **An Elementary Christian Metaphysics** focuses on questions of existence and the nature of revealed truths. Following his historical introduction to metaphysics, Owens provides a general investigation of the first principles and causes of being and also a study of knowledge and of the divine nature and attributes in light of natural reason. Irrespective of one's intellectual genotype, an exposure to the sustained developmental elucidation of Aquinas' insights executed by an author such as Owens can only enhance any metaphysical approach to reality. **The New Scholastic: An Elementary Christian Metaphysics** is intended primarily for undergraduate students as an introduction to metaphysics. The scope of the metaphysical study pursued by Owens includes not only a general investigation of beings but also an analysis of knowledge, epistemology, and of the divine nature, all in light of natural reason. **Studies in Religion** Joseph Owens, 1908-2005. Taught philosophy at the Pontifical Institute of Mediaeval Studies and the University of Toronto for forty years. He is the author of a number of books, including **An Interpretation of Existence**, also published by the University of Notre Dame Press.

**Metaphysics** Takatura Ando, 1963 No Science is subject to such contrary evaluations as metaphysics The number of its admirers is matched by the number of its denigrators and the final outcome hardly seems to be predictable Such instability is admittedly natural to a position of great honour But the problem is not as Kant considered it just a matter of the ability of metaphysics to perform its task What is most perplexing is that we cannot find any single definition of metaphysics common to both its admirers and its denigrators So as to shed some light on this confusion the present inquiry aims at concise survey of the usage of the term
