*Haver-Glover Messenger*, 1950      Encyclopaedia of Mathematics Michiel Hazewinkel, 2013-12-01 This  
ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with  
updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing  
House in five volumes in 1977-1985 The annotated translation consists of ten volumes including a special index volume There  
are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main  
directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been  
that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they  
should be maximally accessible On the whole these articles should be understandable to mathematics students in their first  
specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other  
domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and  
aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain  
background and motivation rather than precise statements of precise theorems with detailed definitions and technical details  
on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete  
problems results and techniques      Encyclopaedia of Mathematics M. Hazewinkel, 2013-11-11      **Proceedings of the**
