'Abd al-Raḥmān ibn Muḥammad Ibn Ḥaldūn,1950      **Ibn Khaldūn's Philosophy of History** Muhsin Mahdi,2015-10-14 This book first published in 1957 is the study of 14th century Arab historian Ibn Khaldun who founded a special science to consider history and culture based on the philosophy of Plato and Aristotle and their Muslim followers In no other field has the revolt of modern Western thought against traditional philosophy been so far reaching in its consequences as in the field of history Ibn Khaldun realized that history is more immediately related to action than political philosophy because it studies the actual state of man and society He found that the ancients had not made history the object of an independent science and thought it was important to fill this gap A factual acquaintance with the conclusions of Ibn Khaldun s reflections on history is not the same as the full comprehension of their theoretical significance When these fundamental questions are answered it becomes possible to pose the specific question of the relation of Ibn Khaldun s philosophy of history or his new science of culture to other practical sciences and particularly to the art of history After an exposition of the major trends of Islamic historiography

part of this book attempts to answer this question through the analysis of the method and intention of the sections of the History where Ibn Khaldun himself examines the works of major Muslim historians shows the necessity of the new science of culture and distinguishes it from other practical sciences *Renaissance Averroism and Its Aftermath: Arabic Philosophy in Early Modern Europe* Anna Akasoy, Guido Giglioni, 2012-12-13 While the transmission of Greek philosophy and science via the Muslim world to western Europe in the Middle Ages has been closely scrutinized the fate of the Arabic philosophical and scientific legacy in later centuries has received less attention a fault this volume aims to correct The authors in this collection discuss in particular the radical ideas associated with Averroism that are attributed to the Aristotle commentator Ibn Rushd 1126 1198 and challenge key doctrines of the Abrahamic religions This volume examines what happened to Averroes s philosophy during the sixteenth seventeenth and eighteenth centuries Did early modern thinkers really no longer pay any attention to the Commentator Were there undercurrents of Averroism after the sixteenth century How did Western authors in this period contextualise Averroes and Arabic philosophy within their own cultural heritage How different was the Averroes they created as a philosopher in a European tradition from Ibn Rushd the theologian jurist and philosopher of the Islamic tradition **A History of Islamic Philosophy** Majid Fakhry, 1983 The first comprehensive survey of Islamic philosophy from the seventh century to the present this classic discusses Islamic thought and its effect on the cultural aspects of Muslim life Fakhry shows how Islamic philosophy has followed from the earliest times a distinctive line of development which gives it the unity and continuity that are the marks of the great intellectual movements of history **An Arab Philosophy of History** Charles Issawi, 1969 **Arabic Thought and Its Place in History** De Lacy O'Leary, 1922 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Encyclopedia of the History of Arabic Science* Roshdi Rashed, 2019-08-08 The Arabic contribution is fundamental to the history of science mathematics and technology but until now no single publication has offered an up to date synthesis of knowledge in this area In three fully illustrated volumes the Encyclopedia of the History of Arabic Science documents the history and philosophy of Arabic science from the earliest times to the present day The set as a whole covers seven centuries Thirty chapters written by an international team of specialists from Europe America the Middle East and Russia cover such areas as astronomy mathematics music engineering nautical science and scientific institutions
