Territorial Pluralism Karlo Basta, John McGarry, Richard Simeon, 2015-01-12 Territorial pluralism is a form of political autonomy designed to accommodate national ethnic or linguistic differences within a state It has the potential to provide for the peaceful democratic and just management of difference But given traditional concerns about state sovereignty nation building and unity how realistic is it to expect that a state s authorities will agree to recognize and empower distinct substate communities Territorial Pluralism answers this question by examining a wide variety of cases including developing and industrialized states and democratic and authoritarian regimes Drawing on examples of both success and failure contributors analyze specific cases to understand the kinds of institutions that emerge in response to demands for territorial pluralism as well as their political effects With identity conflicts continuing to have a major impact on politics around the globe they argue that territorial pluralism remains a legitimate and effective means for managing difference in multinational states
