Quintavalle,2008-09-16 Jamie Donnelly is a high school junior who leads a carefree idyllic life in suburban Southern New
Jersey He has skipped through life relying on his quick wit good looks and natural intelligence His life changes suddenly
when he suffers a cerebral aneurysm and then becomes the first person in the world to have revolutionary technology
surgically implanted Jamie faces his ultimate challenge when he is forced to take on a powerful group of people including a
presidential candidate who see the technology as a way to dominate US politics and business A diverse group of friends bring
their individual talents to help Jamie as he is running for his life trying to solve the mystery of who is behind the conspiracy

of London and of the History of Art at the University of California Berkeley Baxandall s work had a transformative effect on
the study of European Renaissance and eighteenth century art and contributed to a complex transition in the aims and
methods of art history in general during the 1970s 80s and 90s While influential he was also an especially subtle and
independent thinker occasionally a controversial one and many of the implications of his work have yet to be fully understood
and assimilated This collection of 10 essays endeavors to assess the nature of Baxandall s achievement and in particular to
address the issue of the challenges it offers to the practice of art history today This volume provides the most comprehensive
assessment of Baxandall s work to date while drawing upon the archive of Baxandall papers recently deposited at the
