A good minimum daily water recommendation is one half your bodyweight in ounces. For example, 150 pound guy should drink 75oz, or more.	Caffeine is not the enemy! Don't treat them as such. In fact, they will help you power through your workouts for various muscle gains!	Frequent meals is crucial for elevating the metabolism and turning your body into a fat burning furnace.	Avoid the alcohol if possible. One night of heavy drinking is enough to erase the efforts of one week of intense weight training!	Fats slow down digestion. Not a good idea to include them in your post workout meal when quick absorption is key!	All fruit is not created equal. Avoid dried fruit whenever you can have the fresh version. Dried fruits are loaded with sugars, calories and unhealthy nitrates.	Don't be fooled, almonds have by far the most protein of any of the nuts... by almost ten times it's nearest competitor!
