**New Studies in Global IT and Business Services Outsourcing** Julia Kotlarsky, Leslie P. Willcocks, Ilan Oshri, 2011-10-20 This book contains 11 carefully revised and selected papers from the 5th Workshop on Global Sourcing held in Courchevel, France, March 14-17, 2011. They have been gleaned from a vast empirical base brought together by leading researchers in information systems, strategic management, and operations. This volume is intended for use by students, academics, and practitioners interested in the outsourcing and offshoring of information technology and business processes. It offers a review of the key topics in outsourcing and offshoring, populated with practical frameworks that serve as a tool kit for students and managers. The topics discussed combine theoretical and practical insights and are extensively illustrated by case studies from client and vendor organizations. Last but not least, the book examines current and future trends in outsourcing and offshoring, paying particular attention to how innovation can be realized in global or outsourced software development environments.

**Continuous Auditing with AI in the Public Sector** Lourens J. Erasmus, Sezer Bozkus Kahyaoğlu, 2024-09-18 The effectiveness of internal audit activities is important for the sustainability of change in the public sector. In this sense, the tools and techniques used and the level of competencies of public sector auditors are decisive. This book deals with the effects of current technological developments in the public sector on auditing and risk management activities. Therefore, it is a resource for public internal auditors to create a digital audit strategy based on artificial intelligence, AI, and blockchain-based applications. Institutionalisation of their structures is important for public sector internal auditors. For this, basic requirements, future expectations, and best practices are explained. The digital business model is presented to produce value-added audit findings and outputs that guide public internal auditors and all digital era stakeholders. This book is a pioneering work based on continuous auditing, continuous monitoring approaches using various AI and blockchain-based tools and techniques. There is nothing more valuable to the success of a public internal auditor than a detailed understanding of the business. The important lesson in developing business knowledge, especially in the new audit

universe emerging with digital transformation is that all auditors must understand that they never finish learning about business processes risks and control points in the digital era They must constantly push themselves to be motivated and learn about the business operations they audit to implement new audit approaches powered by AI In addition to obtaining up to date business information from process owners and stakeholders public auditors responsible for conducting an AI based continuous audit programme should also look inside their departments for a different perspective on business information that impacts continuous audit programme phase details and has the potential to add value It should be noted that the additional source of information begins with your individual audit experience digital skills and qualifications
