## But wait... how can a ball climb up stairs?

The automaton's ball is made of a special material that is very light and bouncy. It can climb up the stairs because of its unique shape and the way it is designed to interact with the stairs.

The ball is made of a special material that is very light and bouncy. It can climb up the stairs because of its unique shape and the way it is designed to interact with the stairs.

In the automaton, the ball doesn't really climb up the stairs. It just sits on top of them.

Make sure you have all the materials and tools you need before you start. If you don't have all the materials, you can buy them from a hardware store.
