

3 Graphs

concn - x axis = diff. concentrations
y axis = time

0 - at the end → fastest

pH - x axis = pH

y axis = time

temp - x axis = temp

y axis = time

discussion #s - use data from data table she gave us

Discussion

4.3A - pg. 100 # 1, 2

4.3B - pg. 103 work

no # question → disc. ? is not numbered.

4.3C - pg. 107 # 1, 2

Conclusion

Summarize the results.

Explain how changes in environment affect reaction rate of an enzyme.

- Be specific - concn, pH, temp

2. Prepare the experimental test tubes (test-tube set II):

- Number a second set (set II) of five standard test tubes 1 through 5.
- Beginning with tube 5 of set I, transfer 2 mL of this enzyme dilution into tube 5 of set II. Use a 5-mL pipette for the transfer. Rinse the pipette in distilled water, and repeat the procedure for tubes 4, 3, 2, and 1, transferring 2 mL of tube 4 (set I) into tube 4 (set II), and so forth. After these transfers have been carried out, test-tube set I will no longer be used and can be set aside.
- Add 2 mL of pH 6.8 buffer solution to each of the tubes in the second set. Mix by rolling the tubes between your hands. Set these tubes aside.
- Add 1 or 2 drops of I_2KI to each compartment of four rows of a test plate. You will use a separate row for each concentration of amylase.
- Using the second set of tubes, proceed with the tests beginning with tube 5.
 - Using a clean 1-mL pipette, add 1 mL of the 1% starch solution to tube 5 and mix by rolling the tube between your hands. One team member should immediately record the time. This is time 0.
 - Quickly remove 1 drop of the mixture with a disposable pasteur pipette, and add it to a drop of I_2KI in the first compartment on the test plate (time 0).

Remember, when the enzyme and substrate are together, the reaction has begun!

- Sample the reaction mixture at 10-second intervals, each time using a new compartment of the test plate. Continue until a blue color is no longer produced and the I_2KI solution remains yellow-amber (indicating the digestion of all the starch). Record the time required for the digestion of the starch in Table 4.6.
- Repeat steps 1 through 4 for the other four concentrations (tubes 4, 3, 2, and 1 of set II).

- Finish recording your findings in the Results section, and state your conclusions in the Discussion section.

Results

- Complete Table 4.6 as you determine rates of digestion (time of starch disappearance) in different enzyme concentrations.

Biology Laboratory 9th Edition Chegg Com

PT Brinkman

Biology Laboratory 9th Edition Chegg Com:

Whispering the Secrets of Language: An Psychological Journey through **Biology Laboratory 9th Edition Chegg Com**

In a digitally-driven earth wherever screens reign great and immediate connection drowns out the subtleties of language, the profound techniques and emotional nuances hidden within words frequently move unheard. However, situated within the pages of **Biology Laboratory 9th Edition Chegg Com** a fascinating literary prize sporting with raw emotions, lies a fantastic quest waiting to be undertaken. Published by a skilled wordsmith, this charming opus invites readers on an introspective journey, lightly unraveling the veiled truths and profound affect resonating within the cloth of each word. Within the mental depths of the touching evaluation, we can embark upon a honest exploration of the book is core subjects, dissect their charming writing style, and fail to the powerful resonance it evokes heavy within the recesses of readers hearts.
