**Matchmakers** David S. Evans, Richard Schmalensee, 2016-05-03 A different kind of matchmaker Many of the most dynamic public companies from Alibaba to Facebook to Visa and the most valuable start ups such as Airbnb and Uber are matchmakers that connect one group of customers with another group of customers Economists call matchmakers multisided platforms because they provide physical or virtual platforms for multiple groups to get together Dating sites connect people with potential matches for example and ride sharing apps do the same for drivers and riders Although matchmakers have been around for millennia they re becoming more and more popular and profitable due to dramatic advances in technology and a lot of companies that have managed to crack the code of this business model have become today s power brokers Don t let the flashy successes fool you though Starting a matchmaker is one of the toughest business challenges and almost everyone who tries to build one fails In Matchmakers David Evans and Richard Schmalensee two economists who were among the first to analyze multisided platforms and discover their principles and who ve consulted for some of the most successful platform businesses in the world explain how matchmakers work best in practice why they do what they do and how entrepreneurs can improve their chances for success Whether you re an entrepreneur an investor a consumer or an executive your future will involve more and more multisided platforms and Matchmakers rich with stories from platform winners and losers is the one book you ll need in order to navigate this appealing but confusing world

**Study Guide, Brief Principles of Macroeconomics, Third Edition, N. Gregory Mankiw** David R. Hakes, 2004

*The Case for a Carbon Tax* Shi-Ling Hsu, 2012-06-22 There s a simple straightforward way to cut carbon emissions and prevent the most disastrous effects of climate change and we re rejecting it because of irrational political fears That s the central argument of *The Case for a Carbon Tax* a clear eyed sophisticated analysis of climate change policy Shi Ling Hsu examines the four major approaches to curbing CO2 cap and trade command and control regulation government subsidies of alternative energy and carbon taxes Weighing the economic social administrative and political merits of each he demonstrates why a tax is currently the most effective policy Hsu does not claim that a tax is the perfect or only solution but that unlike the alternatives it can be implemented immediately and paired effectively with other approaches In fact the only real barrier is psychological While politicians can present subsidies

and cap and trade as win win solutions the costs of a tax are immediately apparent Hsu deftly explores the social and political factors that prevent us from embracing this commonsense approach And he shows why we must get past our hang ups if we are to avert a global crisis
