**Fusion for Profit** Sharan Jagpal, with the assistance of Shireen Jagpal, 2008-09-26 The corporate world is typically structured in silos. Managers urgently need to overcome this silo effect by fusing ideas across different functional areas in the firm. In *Fusion for Profit*, Sharan Jagpal, a well-known and highly respected multidisciplinary researcher and business consultant, explains in simple language using real-world examples how managers can use sophisticated concepts to fuse different functional areas in the firm, especially marketing and finance, to increase the firm's value. *Managing Technological Innovation: Tools And Methods* Tugrul U Daim, 2017-03-09 The management of technological innovation is both an art as well as a science. The process involves the know-how and technological core skills to deliver the functionality on the one hand and with an ear on the ground, the ability to identify changes in technologies to come up with new innovations on the other. This requires, as a result, frameworks, system tools, and methodologies to improve the yield in innovations. *Managing Technological Innovation* provides a set of tools and case studies for R&D, presenting the methods available to better matching of technologies to strategic directions, supported with case studies to illustrate the evaluation methods. Part 3 covers the development and building of technological portfolios with new products, as well as mitigation strategies. Part 4 focuses on the execution phase of built portfolios, the development of new products. And finally, Part 5 rounds up with a study on the factors which impact the diffusion of technological innovations into the marketplace. This book is a practical guide for R&D professionals and designers, as well as a case study reference for graduate students in pursuit of their project work. *Place Matters* Peter Dreier, John H. Mollenkopf, Todd Swanstrom, 2004 Analyzes the problematic trends facing America's cities and older suburbs and challenges us to put America's urban crisis back on the national agenda. **Analyzing and Managing Risky Investments** John M. Campbell, John Morgan Campbell (Sr.), Robert A. Campbell, 2001 **The Valuation of Information Technology** Christopher Gardner, 2000-02-18 Top executives support The Valuation of Information Technology. This is the first book which I have seen that places corporate decision making on a logical and quantitative basis. Decisions which have traditionally been done by the seat of the pants are subjected to the same rigorous analysis as is routine in the hard sciences. I think this book strikes off in a completely new direction and deserves to be read by anyone contemplating a career in business. Dr. Mel Schwartz, Nobel Laureate in Physics 1988 and Professor Emeritus, Stanford and Columbia Universities. An insightful, rewarding evaluation of information technology with the aim being the creation of shareholder value. Chris Gardner's detailed work shows how powerfully constructive and destructive the forces of innovation can be. Mastering information technology is the key to twenty-first century commercial success. This book is a driver toward that mastery. Tom Gardner, *The Motley Fool* Finally, a clear set of tools for those of us who are trying to find a path through a jungle of complexity. Chris Gardner has clearly and crisply provided a road map of rationality to help direct our path through a chaotic world of accelerating change. Peter Sprague, Founder, Chairman, and CEO, Wave Systems and former
