Cognitive-Behavioral Therapy for Avoidant/Restrictive Food Intake Disorder Jennifer J. Thomas, Kamryn T. Eddy, 2018-11-15 Avoidant restrictive food intake disorder ARFID is a common eating disorder diagnosis that describes children and adults who cannot meet their nutritional needs typically because of sensory sensitivity fear of adverse consequences and or apparent lack of interest in eating or food This book is the first of its kind to offer a specialist treatment specifically for ARFID Developed refined and studied in response to this urgent clinical need this book outlines a specialized cognitive behavioral treatment Cognitive Behavioral Therapy for Avoidant Restrictive Food Intake Disorder CBT AR This treatment is designed for patients across all age groups supported by real life case examples and tools to allow clinicians to apply this new treatment in their own clinical settings

FOOD FACTS FOR TEENAGERS Margaret B. Salmon, 2002-01-01 This book has information that helps fill the gap between modern food technology and nutrition and the use of this knowledge by teenagers Boys and girls are very much aware of the wonders of present day technology They want accurate scientific information to help them in various space age ventures Many know that vital nutrients in the foods they eat affect their appearance strength endurance and resistance to disease Many do not know that foods affect their personalities mental performance and the health of their future children Teenage girls often have not been told that those who are poorly nourished during the teen years will have babies with more congenital abnormalities lower pediatric ratings and more stillborn and premature births than girls who are well fed regardless of how carefully they eat during pregnancy They will have more complications before during and after pregnancy The field of nutrition and food chemistry has become so complex that it is difficult for teenagers to take advantage of information now available Many popular beliefs about foods are based on superstitions rather than scientific truths and many are too complicated to be useful In this book only the most important food facts are presented Simple quick methods for calculating vitamin mineral and calorie content of foods are described Suggestions for economical eating are given as well as inexpensive low calorie recipes Medical checkups by a physician rather than self medication are stressed Since a student's physical appearance and his or her performance in sports and school work are affected by food intake over long periods of time the prime goal of this book is to encourage consistently good food habits

The Adolescent F. Philip Rice, 1992 The Adolescent continues to be the most comprehensive book in its subject area setting the standard for adolescent psychology books since its first publication more than twenty years ago This book emphasizes the eclectic approach to adolescence presenting not just one theory on the subject but many and discussing the contributions strengths and weaknesses of each The authors also take into consideration current and important topics such as ethnic identity formation and gender issues For anyone in the fields of psychology or education with an interest in adolescents
