**China Invents The Digital Totalitarian State Big Data:**

<u>Terrorism and Counter-terrorism in China</u> Michael Clarke,2018 China hitherto barely affected by terrorism now confronts a phenomenon all too familiar to other nations **Global China as Method** Ivan Franceschini,Nicholas Loubere,2022-08-25 Is China part of the world Based on much of the political media and popular discourse in the West the answer is seemingly no Even after four decades of integration into the global socioeconomic system discussions of China continue to be underpinned by a core assumption that the country represents a fundamentally different other that somehow exists outside the real world Either implicitly or explicitly China is generally depicted as an external force with the potential to impact on the normal functioning of things This core assumption of China as an orientalised externalised and separate other ultimately produces a distorted image of both China and the world This Element seeks to illuminate the ways in which the country and people form an integral part of the global capitalist system This title is also available as Open Access on Cambridge Core *Towards Digital Enlightenment* Dirk Helbing,2018-08-27 This new collection of essays follows in the footsteps of the successful volume Thinking Ahead Essays on Big Data Digital Revolution and Participatory Market Society published at a time when our societies were on a path to technological totalitarianism as exemplified by mass surveillance reported by Edward Snowden and others Meanwhile the threats have diversified and tech companies have gathered enough data to create detailed profiles about almost everyone living in the modern world profiles that can predict our behavior better than our friends families or even partners This is not only used to manipulate peoples opinions and voting behaviors but more generally to influence consumer behavior at all levels It is becoming increasingly clear that we are rapidly heading towards a cybernetic society in which algorithms and social bots aim to control both the societal dynamics and individual behaviors span lang EN US style font family However there are also silver linings most of the threats that have accumulated over the past years have been identified and regulations are on the way to being introduced Furthermore entirely novel approaches based on blockchain technology and other developments derived from complexity science offer the possibility of entirely redefining collective trust and building platforms to support our core societal values span lang EN US style font family This book conveys an encouraging vision of the future and provides a sketch of how it may look The road to digital enlightenment is still open but it needs to be taken now pbrp <u>Control</u> Jane Golley,Linda Jaivin,Luigi Tomba,2017-06-05 More cosmopolitan more lively more global is how the China Daily summed up the year 2016 in China It was also a year of more control The Chinese Communist Party laid down strict new rules of conduct for its members continued to assert its dominance over everything from the Internet to the South China Sea and announced a new Five Year Plan that Greenpeace called quite possibly the most important document in the world in setting the pace of acting on climate change The China Story Yearbook 2016 Control surveys the year in China s economy population planning law enforcement and reform environment Internet medicine religion education historiography foreign affairs and culture as well as developments in

Taiwan and Hong Kong **Dog Days** Ivan Franceschini,Nicholas Loubere,2019-04-05 According to the Chinese zodiac 2018 was the year of the earthly dog In the middle of the long hot and feverish dog days of the summer of 2018 some workers at Shenzhen Jasic Technology took their chances and attempted to form an independent union While this action was met by the harshest repression it also led to extraordinary demonstrations of solidarity from small groups of radical students from all over the country which in turn were immediately and severely suppressed China s year of the dog was also imbued with the spirit of another canine Cerberus the three headed hound of Hades with the ravenous advance of the surveillance state and the increasing securitisation of Chinese society starting from the northwestern region of Xinjiang This Yearbook traces these latest developments in Chinese society through a collection of 50 original essays on labour civil society and human rights in China and beyond penned by leading scholars and practitioners from around the world *Digital China: Big Data and Government Managerial Decision* Qing Jiang,2023-04-04 This book is the first practical case study on the application of big data in China s government management scenarios which is important for comprehensively presenting the achievements of China s e government and digital construction as well as deeply understanding the implementation of big data strategy in China The author of this book is one of the earliest practitioners engaged in the study of big data applications and has personally experienced the development major events application cases and industry changes of big data in China Cases in this book are all actual projects carried out The author of this book explains the development history of big data she has personally experienced presenting in an easy to understand way the basic concept and characteristics of big data and practical interpretation which provides important reference for the practical work of government and enterprise managers The application ideas of big data in management innovation are proposed and scenarios are described and discussed in terms of accelerating research on sharing big data in government affairs breaking barriers realizing data flow information sharing creating one stop services improving the corresponding policy system for sharing big data in government affairs building public information platform for e government and strengthening network and information infrastructure Especially for the government personnel in departments this book will give them a better understanding of the charm and value of big data intuitively understand the utilization and analysis of big data carry out effective government management and make correct decisions so as to improve the data literacy of organizations and individuals form scientific support for their own government s decision making and management thus promote the continued construction of digital government digital China and digital economy era based on the application of big data **Surveillance State** Josh Chin,Liza Lin,2022-09-06 Where is the line between digital utopia and digital police state Surveillance State tells the gripping startling and detailed story of how China s Communist Party is building a new kind of political control shaping the will of the people through the sophisticated and often brutal harnessing of data It is a story born in Silicon Valley and America s War on Terror and now playing out in alarming ways on China s remote Central Asian frontier As ethnic minorities in a border region strain against Party control China s

leaders have built a dystopian police state that keeps millions under the constant gaze of security forces armed with AI But across the country in the city of Hangzhou the government is weaving a digital utopia where technology helps optimize everything from traffic patterns to food safety to emergency response Award winning journalists Josh Chin and Liza Lin take readers on a journey through the new world China is building within its borders and beyond Telling harrowing stories of the people and families affected by the Party s ambitions Surveillance State reveals a future that is already underway a new society engineered around the power of digital surveillance      *China's Digital Civilization* Michael Filimowicz,2023-05-31 This book focuses on the algorithmic turn in state surveillance and the development of new platforms that allow the Chinese Communist Party CCP to shape human behavior in all areas of life through its widespread social credit system Perhaps no country has gone further than China in setting up overt systematic tracking surveillance and constant computational evaluation of its citizens Everyday life is saturated with a pervasive digitization that affects social mobility economic opportunities and personal freedoms Global organizations operating in China have to take account of the ramifications of these systems for data protection within the CCP s explicit project of forming a digital civilization The volume covers the new technological practices that have transformed how states acquire and analyze personal data the TikTok ification of society as social credit platforms built on the familiarity with this popular app s interaction paradigm and the fast expansion of the digital economy that followed the new legal status of data as a production component in 2019 Scholars and students from many backgrounds as well as policy makers journalists and the general reading public will find a multidisciplinary approach to questions posed by research into China s digital civilization project from media journalism communication and global studies      **China's Digital Authoritarianism** Monique Taylor,2022-08-24 This book provides a governance perspective on China s digital authoritarianism by examining the political and institutional dynamics of the country s internet sector in a historical context Using leading theories of authoritarian institutions it discusses China s approach to the internet and methods of implementation in terms of party state institutions and policy processes This provides a much needed inside out perspective on digital authoritarianism that avoids the perception of China as some coherent and static monolith The study also offers a powerful rationale for China s cyber sovereignty as an externalisation of its domestic internet governance framework and broader political economic context As China shifts from rule taker to rule maker in world politics the Chinese Dream zhongguo meng is now going global Beijing s digital authoritarian toolkit is being promoted and exported to other authoritarian regimes making China a major driver of digital repression at the global level      Digital Totalitarianism Michael Filimowicz,2022-02-15 Digital Totalitarianism Algorithms and Society focuses on important challenges to democratic values posed by our computational regimes policing the freedom of inquiry risks to the personal autonomy of thought NeoLiberal management of human creativity and the collapse of critical thinking with the social media fueled rise of conspiranoia Digital networks allow for a granularity and pervasiveness of surveillance by government and corporate entities This creates power

asymmetries where each citizen s daily data exhaust can be used for manipulative and controlling ends by powerful institutional actors This volume explores key erosions in our fundamental human values associated with free societies by covering government surveillance of library based activities cognitive enhancement debates the increasing business orientation of art schools and the proliferation of conspiracy theories in network media Scholars and students from many backgrounds as well as policy makers journalists and the general reading public will find a multidisciplinary approach to questions of totalitarian tendencies encompassing research from Communication Rhetoric Library Sciences Art and New Media **China's Globalizing Internet** Yu Hong,Eric Harwit,2022-09-05 This book considers the Chinese internet as an ensemble of ideas ownership policies laws and interests that intersect with pre existing global elements and increasingly with deepening globalizing imperatives It extends traditional inquiry about digital China and globalization and encourages closer attention to contestation shifting international order transformation of states and new requirements of global digital capitalism Across the three foci of history power and governance this book considers the ways the Chinese internet is entangled with transnational capitals ideas and institutions while at the same time manifests a strong globalizing drive It begins with a historical political economy approach that emphasizes the dialectics between structural imperatives and historical contingency As for governance the Chinese state has set out to re regulate the internet as the network becomes ubiquitous during the nation s web oriented digital transformation Such a state centric governance model however is likely to affect China s global expansion apart from the fact that the state is taking an active interest in global internet governance This book will be of interest to researchers and advanced students of Communication Studies Politics Sociology Economics Cultural Studies and Science and Technology Studies The chapters in this book were originally published as a special issue of the Chinese Journal of Communication **We Have Been Harmonized** Kai Strittmatter,2020-09 A remarkable book The more one reads the more pressing one conclusion becomes almost everything we thought we knew about contemporary China is wrong The Observer Book of the Week Hailed as a masterwork of reporting and analysis and based on decades of research within China We Have Been Harmonized by award winning correspondent Kai Strittmatter offers a groundbreaking look at how the inter net and high tech have allowed China to create the largest and most effective surveillance state in history China s new drive for repression is being underpinned by unpre cedented advances in technology facial and voice recognition GPS tracking supercomputer databases intercepted cell phone conver sations the monitoring of app use and millions of high resolution security cameras make it nearly impossible for a Chinese citizen to hide anything from authorities Commercial transactions including food deliveries and online purchases are fed into vast databases along with everything from biometric information to social media activities to methods of birth control Cameras so advanced that they can locate a single person within a stadium crowd of 60 000 scan for faces and walking patterns to track each individual s move ment In some schools children s facial expressions are monitored to make sure they are paying attention at the right times In a new

Social Credit System each citizen is given a score for good behavior for those who rate poorly punishments include being banned from flying or taking high speed trains exclusion from certain jobs and preventing their children from attending better schools And it gets worse advanced surveillance has led to the imprisonment of more than a million Chinese citizens in western China alone many held in draconian reeducation camps This digital totalitarianism has been made possible not only with the help of Chinese private tech companies but the complic ity of Western governments and corporations eager to gain access to China s huge market And while governments debate trade wars and tariffs the Chinese Communist Party and its local partners are aggressively stepping up their efforts to export their surveillance technology abroad including to the United States We Have Been Harmonized is a terrifying portrait of life under unprecedented government surveillance and a dire warning about what could happen anywhere under the pretense of national security Terrifying A warning call The Sunday Times UK a Best Book of the Year so Far Rana Mitter Sunday Times UK a Best Book of the Year so Far      ,      **The New Big Brother** ,2020 The report s comprehensive analysis of China s digital authoritarianism describes how the People s Republic of China is successfully developing and implementing its malign governance model internally and increasingly making inroads with other countries to also embrace its new digital doctrine It further illustrates how the expansion of digital authoritarianism in China and abroad has drastic consequences for U S and allied security interests the promotion of human rights and the future stability of cyberspace Consequently the report calls for a series of both Congressional and Executive actions designed to counter China s efforts to expand its model of digital authoritarianism to strengthen U S technological innovation and to reinvigorate our diplomatic endeavors around the globe on digital issues      *China 4.0: Party and Society Debate the Digital Transformation* ,2017 Abstract The development of China s Internet attracted great attention among foreign observers in 2016 This was due to record sales in Internet trade extensive hacker attacks on private companies and government agencies huge investment programmes for start ups a new controversial Internet law and the growth of government Internet censorship China 4 0 stands for both control and creativity How does that work What is the Chinese public saying about the opportunities and risks of the digital transformation What goals is the government pursuing particularly with their Big Data and Internet Plus strategies And what are the consequences of a new law on Internet security which comes into force in June 2017 New frameworks are being defined that could shape long term cooperation with China on issues surrounding digitisation An analysis of opinions emanating from Party members economists the military and scientists sheds light on the positions that are currently dominating Chinese disco
