**Building Structures** James E. Ambrose, 1993. Construction Details From Architectural Graphic Standards Eighth Edition Edited by James Ambrose. A concise reference tool for the professional involved in the production of details for building construction. This abridgement of the classic Architectural Graphic Standards provides indispensable guidance on standardizing detail work without having to create the needed details from scratch. An ideal how-to manual for the working draftsman, this convenient portable edition covers general planning and design, data, sitework, concrete, masonry, metals, wood, doors and windows, finishes, specialties, equipment, furnishings, special construction, energy design, historic preservation, and more. Construction Details also includes extensive references to additional information as well as AGS's hallmark illustrations. 1991 0 471 54899 5 408 pp.

**Fundamentals of Building Construction: Materials and Methods** Second Edition Edward Allen. A thoughtful overview of the entire construction industry from homes to skyscrapers, there's plenty here for the aspiring tradesperson or anyone else who's fascinated by the art of building. Fine Homebuilding. Beginning with the materials of the ancients—wood, stone, and brick—this important work is a guide to the structural systems that have made these and more contemporary building materials the irreplaceable basics of modern architecture. Detailing the structural systems most widely used today—heavy timber framing, wood platform framing, masonry loadbearing wall, structural steel framing, and concrete framing systems—the book describes each system's historical development, how the major material is obtained and processed, tools and working methods, as well as each system's relative merits. Designed as a primer to building basics, the book features a list of key terms and concepts, review questions and exercises, as well as hundreds of drawings and photographs illustrating the materials and methods described. 1990 0 471 50911 6 803 pp.
