Geely Car Repair :

Non-Linear Growth Xiaobo Wu, Jian Du, Sihan Li, 2023-12-15 This book offers a comprehensive exploration of the transformative trajectory undertaken by Chinese domestic enterprises with a particular focus on Geely Automobile. Comprising five chapters and totaling 13 sections, the study delves into Geely's remarkable progression from a state of catch-up to surpassing established competitors. The initial chapter chronicles Geely's entry into the automotive industry amidst resource and technological scarcity, shedding light on the strategies employed to achieve breakthroughs during the nascent stages. The subsequent section elucidates Geely's transition from a late entrant to a prominent player in the global automotive market, facilitated by innovative practices across organizational, technological, talent-driven, quality-oriented, and cultural dimensions. The third chapter examines Geely's successful foray into globalization, offering a comprehensive analysis of its non-linear growth trajectory, overseas mergers and acquisitions, and strategic expansion efforts. The fourth part explores Geely's approach to embracing uncertainty and navigating cyclical challenges in the automotive industry, seeking determinative opportunities for future growth. Finally, the concluding chapter draws insights from Geely's non-linear growth and advances the C theory, an enriched local innovation management framework grounded in China's unique developmental context.

Winning in China Lele Sang, Karl Ulrich, 2021-01-19 If Amazon can't win in China, can anyone? When Amazon CEO Jeff Bezos visited China in 2007, he expected that one day soon China would be a double-digit percentage of Amazon's sales. Yet by 2019, Amazon, the most powerful and successful e-commerce company in the world, had quit China. In *Winning in China: 8 Stories of Success and Failure in the World's Largest Economy*, Wharton experts Lele Sang and Karl Ulrich explore the success and failure of several well-known companies, including Hyundai, LinkedIn, Sequoia Capital, and InMobi, as more and more businesses look to reap profits from the demand of 1.4 billion people. Sang, a Global Fellow at the Wharton School of the University of Pennsylvania, and Ulrich, Vice Dean of Entrepreneurship and Innovation at the Wharton School, answer four critical questions: Which factors explain the success or failure of foreign companies entering China? What challenges and pitfalls can a company entering China expect to encounter? How can a prospective entrant realistically assess its chances? Which managerial decisions are critical, and which approaches are most effective? Sang and Ulrich answer these questions by examining the stories of eight well-known and respected companies that have entered China. They study how Norwegian Cruise Line's entry into China displays how cultural differences can boost or sink different companies; how Intel, one of the oldest and most respected firms in Silicon Valley, thrived in a country that seems to favor agile upstarts; how Zegna, the Italian luxury brand, has emerged as another surprising success story and how it plans to navigate new headwinds from the COVID-19 pandemic. Through these engaging and illuminating stories, Sang and Ulrich offer a framework and path for organizations looking for a way to successfully enter the world's largest economy. History can be a teacher, and China, a country with 3,500 years of written history, has much to teach.

Decoding The Rise Of Made-in-china: Why The Continuity Of Catch-up Ladder Ultimately Matters Bin Guo,2023-03-23 This book provides a novel theoretical framework to explain the real source of competitive advantage of Chinese manufacturing More importantly such a framework can be generalized to analyze the potential of catch up for large emerging economies in the globalization era The book also provides insights for policy makers to rethink their design of policies The rise of Made in China products has been widely attributed to low labour cost advantage and imitation advantage However as these two advantages are nearly innate to all late developing countries they cannot be regarded as the key factors that drive the rapid growth of China s manufacturing industry or China s economy over the past few decades In this book the author proposed a theory the catch up ladders theory to explain the rise of China s manufacturing industry The manufacturing advancement of any country is in essence a process of catching up in both market and technology during which enterprises will form a ladder like holistic structure due to their differences in capabilities technology and market positioning In light of this the continuity of the catch up ladder will greatly determine the catch up efficiency of an industry and even a country at large Such a perspective is more applicable to large emerging economies especially those with over one hundred million population and thus huge potential domestic market demand
