GENERAL CHEMISTRY

The Essential Concepts

The cover features several molecular models on a dark, textured background. In the center, a diatomic molecule is shown with two purple spheres connected by a light-colored rod. To its right, a larger molecule with two purple spheres is depicted. In the lower-left corner, two purple spheres are shown with a bright green laser beam passing through them. Scattered throughout the background are numerous smaller, fainter molecular models, some consisting of two purple spheres and others of a single purple sphere. A green arrow curves upwards from the central diatomic molecule towards the upper right.

General Chemistry Raymond Chang, Jason Scott Overby, 2011 The sixth edition of General Chemistry continues the tradition of presenting only the material that is essential for a one year general chemistry course It strikes a balance between theory and application by incorporating real world examples helping students visualize the three dimensional atomic and molecular structures that are the basis of chemical activity and developing problem solving and critical thinking skills Although the sixth edition incorporates many impressive features such as macro to micro artwork animations correlated to the text and hand sketched worked examples General Chemistry is still 200 to 300 pages shorter and much less expensive than other two semester textbooks Dr Chang s concise but thorough approach will appeal to efficiency minded instructors and value conscious students
