*Sustainable Solutions for Elemental Deficiency and Excess in Crop Plants* Kumkum Mishra, Pramod Kumar Tandon, Sudhakar Srivastava, 2020-11-28 This book covers all aspects of deficiency of essential elements and excess of toxic ones in crop plants. The metal deficiency and toxicity are the two sides of the same problem that are threatening to sustainable agricultural growth. The book presents prospective strategies for the management of elemental nutrition of crop plants. Chapters are arranged in a manner so as to develop a lucid picture of the topic beginning from basics to advanced research. The content is supplemented with flow charts and figures to make it convenient for readers to holistically grasp the concepts. It will be a value addition for students, research scholars, and professionals in understanding the basics as well as latest developments in the area of metal deficiency and excess in crop plants. [Hierarchical Control and Optimization Strategies Applied to Solar Membrane Distillation Facilities](#) Juan D. Gil, 2023-04-13 This book offers a systematic study of control algorithms applied in the operation of solar membrane distillation (SMD) facilities. After a short introduction to membrane distillation systems powered by solar energy, it reports on the various stages of the development of a comprehensive operating strategy based on modelling, control, and optimization techniques, which enables an improved operation of SMD plants, helping the commercialization of the SMD technology. A special focus of the research was to maximize the distillate production of the MD modules while reducing their thermal energy consumption, being those two important weaknesses of the current technology, as well as their minimizing operating costs. The optimized operating strategies were tested in a real pilot plant located at Plataforma Solar de Almería, a dependency of the Centro de Investigaciones Energéticas Medioambientales y Tecnológicas (CIEMAT) of Spain. All in all, this thesis offers extensive information on control and modeling algorithms and on their practical applications in solar membrane distillation plants. [Composting of Farm Residues by Nature-Based Solutions](#) Rupesh Kumar Singh, Henrique Trindade, João Ricardo Sousa, Arne Sæbø, Vishnu D. Rajput, Tao Zhang, 2026-03-22 Sustainable management of organic residues has drawn attention to develop a model circular-based economy in agriculture. Exponential increase in animal farming to meet the food security goals appeared as one of the major contributors of organic waste. Sustainable and effective transformation of this waste into fertilization resource has become an urgent topic for environmental protection, while newly imposed regulations have been enforcing researchers to obtain nature-based solutions (NBS). Major problems during composting of organic residues are greenhouse gas emission (GHG), nutrient loss, ammonia volatilization, denitrification, nitrate leaching, thus poor quality manures production. Thus, it is necessary to understand the mechanism during the composting process to develop sustainable composting practices by using NBS to address multiple issues by a unique treatment method. The future of agriculture must change to adopt more sustainable approaches and recycling the organic residues to minimize the environmental impacts. Application of these transformed organic residues to soil to improve the soil's natural properties and enrich the natural microbiome. The better crop

performance and improved environmental health in a holistic approach is major objective The past decade provided innovations and new technologies on the impact and use of organic composts in fields with tremendous outcomes This book provides a wider and recent literature on evolution multiple nature based solutions reduced environmental hazards and better management of organic waste produce towards transformation into usable manure for value added services This compilation may provide a basis of further investigation of this potential key to achieve the sustainable management practices in modern agriculture
