Road transport is primarily the most notable source of pollution in the world. With the sophistication in environmental technology, a variety of environmentally friendly products have been introduced in the market, and hybrid vehicle is highly recommended. However, in Malaysia, automotive market demand for hybrid vehicle is still considered very low compared to non-hybrid vehicles, and thus to conduct a study on consumer's adoption toward hybrid car is timely. The study investigated the relationships between marketing mix (4Ps), environmental concern, governmental incentive and purchase intention of hybrid car in Malaysia. A total of 372 valid samples were collected using convenience sampling technique. The Structural Equation Modelling (SEM) by using Smart PLS was employed to investigate the significance of individual path correlations, measurement model and overall fit of

structural model The results of the study revealed that marketing mix 4Ps governmental incentive attitude subject norm and perceived behavioural control showed a significant and positive relationship with hybrid car purchase intention In addition environmental concern exhibits the moderation effect among those relationships Value Dominant Logic Gautam Mahajan,2018-12-07 Increasing disruption diminishing returns and demanding customers require business leaders to create more value remain relevant and stay ahead of competition CEOs must evolve a value creation culture for the company in order to properly balance the interests of customers employees investors and the marketplace People who succeed succeed because they create value but they do so unconsciously Creating value consciously makes you create more value and destroy less value Doing something good or improving the well being of someone creates value You buy and re buy a product on a value basis Value dominant logic is relevant to all of us Value creation is used in all fields but is not well understood This book takes value creation to the next level showing how value is basic to human endeavor and is not focused on enough even when we try to create value Most books on value creation focus on creating monetary value for companies This book suggests that value is greatly created and enhanced by creating value for others To create value for customers one must first create value for the providers including employees suppliers and the society at large The goal is to improve the quality of life and well being This book provides ways of implementing these thoughts and educates readers about value and how to create it **Journal of General Management** ,1975 Business Essentials Ronald J. Ebert,Ricky W.
