

Philosophy, Science and Religion for Everyone

Philosophy, Science and Religion for Everyone brings together these great truth-seeking disciplines and seeks to understand the ways in which they challenge and inform each other.

Key topics and their areas of focus include:

- **Foundational Issues** – why should anyone care about the science-and-religion debate? How do scientific claims relate to the truth? Is evolution compatible with design?
- **Faith and Rationality** – can faith ever be rational? Are theism and atheism totally opposed? Is God hidden or does God simply not exist?
- **Faith and Science** – what provides a better explanation for the origin of the universe – science or religion? Faith and physics: can they be reconciled? Does contemporary neuroscience debunk religious belief? Creationism and evolutionary biology – what constitutes science and what constitutes pseudo-science?
- **Practical Implications** – is fundamentalism just a problem for religious people? What are the ethical implications of the science-and-religion debate? Do logic and religion mix?
