

Unit 1: Historical Development of Scientific Theory

- Scientists conduct experiments, collect results, observe, and draw conclusions.
- They use this knowledge to develop general principles and theories.
- Theories describe observed phenomena and predict unobserved phenomena.
- New knowledge evolves these models.

- Science is not a list of facts but a way of thinking about the universe.
- New scientific knowledge, despite being based on experimental evidence, isn't always accepted.
- New knowledge requires sound experimental evidence and support from other scientists.
