Pipe Stress Engineering:

Pipe Stress Engineering Liang-Chuan Peng, Tsen-Loong Peng, 2009 An up to date and practical reference book on piping engineering and stress analysis this book emphasizes three main concepts using engineering common sense to foresee a potential piping stress problem performing the stress analysis to confirm the problem and lastly optimizing the design to solve the problem Systematically the book proceeds from basic piping flexibility analyses spring hanger selections and expansion joint applications to vibration stress evaluations and general dynamic analyses Emphasis is placed on the interface with connecting equipment such as vessels tanks heaters turbines pumps and compressors Chapters dealing with discontinuity stresses special thermal problems and cross country pipelines are also included Calculator Programs for Pipe Stress Engineering Kenneth Scott Morgan, 1986 A comprehensive collection of programs for solving a wide variety of stress problems using both the TI 59 and HP 41CV calculators Each program is prefaced with a description of the problem to be solved the nomenclature code restrictions and program limitations Solutions are explained analytically and then followed by the complete program listing documentation and checklists Topics include calculations for pipewall thickness pressure vessel analysis reinforcement pads allowable span vibration stress and two anchor piping systems *Introduction to Pipe Stress Analysis* Sam Kannappan, 1986-05 Introduction to Pipe Stress Analysis offers a practical approach to analytical piping design Many approaches to design are presented that are used in engineering consulting companies but are not available in books Engineering equations from many piping codes are used and discussed Covered are problems encountered in the determination of pipe wall thickness and span limitations the design of piping configurations and of supports and connections that may be subject to varying temperatures and loads and the making of connections to rotating and nonrotating machinery Contains worked examples and computer programs for piping analysis Stress Corrosion Cracking of Pipelines Y. Frank Cheng, 2013-02-13 Explains why pipeline stress corrosion cracking happens and how it can be prevented Pipelines sit at the heart of the global economy When they are in good working order they deliver fuel to meet the ever growing demand for energy around the world When they fail due to stress corrosion cracking they can wreak environmental havoc This book skillfully explains the fundamental science and engineering of pipeline stress corrosion cracking based on the latest research findings and actual case histories The author explains how and why pipelines fall prey to stress corrosion cracking and then offers tested and proven strategies for preventing detecting and monitoring it in order to prevent pipeline failure Stress Corrosion Cracking of Pipelines begins with a brief introduction and then explores general principals of stress corrosion cracking including two detailed case studies of pipeline failure Next the author covers Near neutral pH stress corrosion cracking of pipelines High pH stress corrosion cracking of pipelines Stress corrosion cracking of pipelines in acidic soil environments Stress corrosion cracking at pipeline welds Stress corrosion cracking of high strength pipeline steels The final chapter is dedicated to effective management and mitigation of pipeline stress corrosion cracking Throughout the book the

author develops a number of theoretical models and concepts based on advanced microscopic electrochemical measurements to help readers better understand the occurrence of stress corrosion cracking By examining all aspects of pipeline stress corrosion cracking the causes mechanisms and management strategies this book enables engineers to construct better pipelines and then maintain and monitor them to ensure safe reliable energy supplies for the world **Hispanic Engineer & IT**, 2011 Hispanic Engineer Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans **Applied Mechanics Reviews**, 1987 *Calculation of Pipe Stress* Ju-Pei Li, 1947 **The Engineering Index**, 1924 Engineering Index, 1925 **Nuclear Regulatory Commission Issuances** U.S. Nuclear Regulatory Commission, 1983 *Experiments on Loss of Head in U, S, and Twisted S Pipe Bends* Charles Ives Corp, Henry Thomas Hartwell, 1927 **Pipe Stress Model Study** Warren R.
