Integrative Document & Content Management Len Asprey, Michael Middleton, 2003-01-01
Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra-campus bridges as it is about user interfaces and content. *Designing Portals: Opportunities and Challenges* discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy by taking the reader through the processes of conceptualization, design and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere.

Lean Six Sigma Using SigmaXL and Minitab Issa Bass, Barbara Lawton, 2009-01-05
Effectively Execute Lean Six Sigma Projects using SigmaXL and Minitab. Written by a Six Sigma Master Black Belt and a Ph.D., this practical guide to Lean Six Sigma project execution follows the DMAIC (Define, Measure, Analyze, Improve, and Control) roadmap. The many real-world examples used in the book offer in-depth theoretical analyses and are implemented using the two most popular statistical software suites, SigmaXL and Minitab. This expert resource covers Lean topics ranging from basic data analysis to complex design of experiments and statistical process control. Harness the power of SigmaXL and Minitab and enable sustained positive operational results throughout your organization with help from this authoritative guide. *Lean Six Sigma Using SigmaXL and Minitab* explains how to: Define the project goals, project manager value statement, stakeholders and risk; Schedule tasks using the Gantt chart, critical path analysis and program evaluation and review technique; Capture the voice of internal and external customers; Assess the cost of quality; Gather data and measure process performance; Perform process capabilities analysis; Apply Lean Six Sigma metrics to determine baseline performance; Implement analysis techniques such as Pareto analysis, value stream mapping, failure mode and effect analysis (FMEA) and regression analysis; Identify constraints via factorial experiments and implement process improvements; Monitor production performance using statistical process control.
