The Right Honourable Gentleman Wikipedia:

Postmodern Imperialism Eric Walberg, 2011-06-09 Eric Walberg's POSTMODERN IMPERIALISM Geopolitics and the Great Game is a riveting and radically new analysis of the imperialist onslaught which first engulfed the world in successive waves in the 19th 20th centuries and is today hurtling into its endgame The term Great Game was coined in the nineteenth century reflecting the flippancy of statesmen and historians personally untouched by the havoc that they wreaked What it purported to describe was the rivalry between Russia and Britain over interests in India But Britain was playing its deadly game across all of Eurasia from the Balkans and Palestine to China and southeast Asia alternately undermining and carving up premodern states disrupting the lives of hundreds of millions with consequences that endure today With roots in the European enlightenment shaped by Christian and Jewish cultures and given economic rationale by industrial capitalism the inter imperialist competition turned the entire world into a conflict zone leaving no territory neutral The first game was brought to a close by the cataclysm of World War I But that did not mark the end of it Walberg resurrects the forbidden word to scrutinize an imperialism now in denial but following the same logic and with equally horrendous human costs What he terms Great Game II then began with America eventually uniting its former imperial rivals in an even more deadly game to destroy their common revolutionary antagonist and potential nemesis communism Having won this game America and the new player Israel offspring of the early games have sought to entrench what Walberg terms empire and a half on a now global playing field using a neoliberal agenda backed by shock and awe With swift sure strokes Walberg paints the struggle between domination and resistance on a global canvas as imperialism engages its two great challengers communism and Islam its secular and religious antidotes Paul Atwood War and Empire The American Way of Life calls it an epic corrective It is a carefully argued and most of all cliché smashing road map according to Pepe Escobar journalist Asia Times Rigorously documented it is a valuable resource for all those interested in how imperialism works and sure to spark discussion about the theory of imperialism according to John Bell Capitalism and the Dialectic

An African Biographical Dictionary Norbert C. Brockman, 2006 Up to date and representative of African societies as a whole An African Biographical Dictionary provides a wealth of vital information for students of African culture and is an indispensable reference guide for anyone interested in African affairs

Textual Curation Krista Kennedy, 2016-11-01 A study of the roles community financial support texts information structures interfaces and technology play in collaborative works Wikipedia is arguably the most famous collaboratively written text of our time but few know that nearly three hundred years ago Ephraim Chambers proposed an encyclopedia written by a wide range of contributors from illiterate craftspeople to titled gentry Chambers wrote that incorporating information submitted by the public would considerably strengthen the second edition of his well received Cyclop dia which relied on previously published information In Textual Curation Krista Kennedy examines the editing and production histories of the Cyclop dia and Wikipedia the ramifications of robot written texts and the issues of intellectual

property theory and credit Kennedy also documents the evolution of both encyclopedias as well as the participation of central players in discussions about the influence of technology and collaboration in early modern and contemporary culture Through this comparative study based on extensive archival research and data driven analysis Kennedy illuminates the deeply situated nature of authorship which is dependent on cultural approval and stable funding sources as much as it is on original genius and the ownership of intellectual property Kennedy s work significantly revises long held notions of authorial agency and autonomy establishing the continuity of new writing projects such as wikis with longstanding authorial practices that she calls textual curation This study examines a wide range of texts that recompose accepted knowledge into reliable complex reference works combining contributions of article text alongside less commonly considered elements such as metadata vocabularies cross indexing and the development of print and digital interfaces Comparison of analog and networked texts also lays bare the impact of technological developments both in the composing process and in the topics that can practically be included in such a text By examining the human and technological curators that support these encyclopedias as well as the discourses that surround them Kennedy develops textual curation as a longstanding theory and process that offers a nuanced construction of authorship [Parliamentary Debates](#) New Zealand.
