The Sea And Civilization Iroiroore:

The Sea and Civilization Lincoln Paine,2015-10-27 A monumental retelling of world history through the lens of the sea revealing in breathtaking depth how people first came into contact with one another by ocean and river lake and stream and how goods languages religions and entire cultures spread across and along the world's waterways bringing together civilizations and defining what makes us most human The Sea and Civilization is a mesmerizing rhapsodic narrative of maritime enterprise from the origins of long distance migration to the great seafaring cultures of antiquity from Song Dynasty human powered paddle boats to aircraft carriers and container ships Lincoln Paine takes the reader on an intellectual adventure casting the world in a new light in which the sea reigns supreme Above all Paine makes clear how the rise and fall of civilizations can be linked to the sea An accomplishment of both great sweep and illuminating detail The Sea and Civilization is a stunning work of history [A Cultural History of the Sea in Antiquity](#) Marie-Claire Beaulieu,2024-09-19 The sea is omnipresent in the ancient cultures of the Mediterranean basin It is an inexhaustible source of food but also a well traveled roadway and a means to communicate trade with or wage war against one's neighbors Perhaps because these practical meanings of the sea were so deeply embedded in daily life the sea also had a profound religious and symbolic significance for ancient people from the worship of sea deities by anxious mariners to the creation of intricate literary devices based on the wine dark sea and concepts such as insularity People even imagined that at the edge of the world where the ocean meets the sky was the entrance to the Underworld as well as to Olympus the realm of the gods In between these distant mythical shores and the well known contours of the Mediterranean was a space where all utopias and dystopias could be projected a space to discover and rediscover endlessly This volume addresses the constant interplay between the real and the imaginary significance of the sea in ancient thought from philosophy and science to shipbuilding trade routes military technology poetry mythmaking and iconography The volume spans a period of almost two millennia and an area that covers Spain to India and China and West Africa to the British Isles demonstrating the global interconnection of cultures and trade conceived in its broadest possible sense in the ancient world **Mer Dans L'histoire** Christian Buchet,Michel Balard,2017 An assessment of how important the sea was in the middle ages **Mer Dans L'histoire** Michel Balard,Christian Buchet,2017 How important has the sea been in the development of human history Very important indeed is the conclusion of this ground breaking four volume work The books bring together the world's leading maritime historians who address the question of what difference the sea has made in relation to around 250 situations ranging from the earliest times to the present They consider across the entire world subjects related to human migration trade economic development warfare the building of political units including states and empires the dissemination of ideas culture and religion and much more showing how the sea was crucial to all these aspects of human development The Sea in History The Medieval World covers the period from the end of the Roman Empire in the West up to around the year 1500 It demonstrates that for many peoples

and states in this period the sea was central to their existence the Vikings the Hanse Venice Genoa the Normans and it shows also how important the sea was for states which are not normally thought of as maritime powers such as Byzantium the Crusader states and the Mongol Empire The book is global in its coverage including material on East and Southeast Asia Latin America and the Caribbean and Africa with particularly interesting material on China s extensive voyages of exploration in the fifteenth century the role of the Vikings in the early formation of Russia and on the building of ships appropriate to local conditions in different parts of the world 40 of the contributions are in English 34 are in French MICHEL BALARD is Emeritus Professor at the University Paris 1 Panth on Sorbonne CHRISTIAN BUCHET is Professor of Maritime History Catholic University of Paris Scientific Director of Oc anides and a member of l Acad mie de marine

Margaret Cohen, 2021. Throughout history, how has the sea served as a site for cross-cultural exchange, trade, and migration? As historians, how do the fields of naval history, maritime history, and oceanic history intersect? 56 experts, 48 chapters, and over 1,700 pages explore how representation and understanding of the sea has developed over 2,500 years of cultural and natural history. Individual volume editors ensure the cohesion of the whole and to make it as easy as possible to use. Chapter titles are identical across each of the volumes. This gives the choice of reading about a specific period in one of the volumes or following a theme across history by reading the relevant chapter in each of the six. The six volumes cover: 1. Antiquity (500 BCE–800 CE), 2. Medieval Age (800–1450), 3. Renaissance (1450–1650), 4. Age of Enlightenment (1650–1800), 5. Age of Empire (1800–1920), 6. Modern Age (1920–2000). Each volume adopts the same thematic structure, covering: Knowledges, Practices, Networks, Islands and Shores, Travelers, Representation, Imaginary Worlds, and Conflicts, enabling readers to trace one theme throughout history as well as gaining a thorough overview of each individual period.

The Sea in History
Christian Buchet, Gérard Le Bouëdec, 2017. How important has the sea been in the development of human history? Very important, indeed, is the conclusion of this ground-breaking four-volume work. The books bring together the world's leading maritime historians who address the question of what difference the sea has made in relation to around 250 situations ranging from the earliest times to the present. They consider across the entire world subjects related to human migration, trade, economic development, warfare, the building of political units (including states and empires), the dissemination of ideas, culture, and religion, and much more, showing how the sea was crucial to all these aspects of human development.

The Sea in History: The Early Modern World
This volume covers the period from around the end of the fifteenth century up to the conclusion of the Napoleonic Wars in 1815. It examines the establishment and growth of the Atlantic World but also considers maritime developments in the Indian Ocean, Southeast Asia, and Africa, and highlights the continuing importance of the North Sea and the Baltic. A very wide range of maritime subjects is explored, including trade (which went through a huge global expansion in this period), fishing, shipping, shipbuilding, navigation, and ports, the role of the sea in the dissemination of religious ideas, the nature of life for

sailors in different places and periods and the impact of trade in particularly important commodities including wine slaves sugar and tobacco One particularly interesting chapter is on the Hanse the important maritime commercial empire based in north Germany which extended much more widely than is often realised and whose significance and huge impact have often been overlooked 33 of the contributions are in English 42 are in French CHRISTIAN BUCHET is Professor of Maritime History Catholic University of Paris Scientific Director of Oc anides and a member of l Acad mie de marine G RARD LE BOUDEC is Emeritus Professor of the University of South Brittany
