SWOT analysis of Netflix Emmy Bethmann, 2020-06-08 Seminar paper from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1.0 University of Applied Sciences Hamburg Hochschule Macromedia course Lehrprojekt 1 language English abstract In this project thesis a SWOT analysis will be performed on the media company Netflix Inc. Netflix is the world's leading internet entertainment service with over 109 million members in over 190 countries. It ranks place 28 in 2017's list of the top 100 world's largest media companies. The success of Netflix has increased constantly in recent years. The reason for this is the evolution of media consumption. The new generation watches series and movies on streaming platforms like Netflix and no longer on television. People have become more independent and can decide for themselves when and where they want to follow their series and movies. Netflix's influence grew in the past but the fight about the TV has not started yet. One day in the near future it will commence and Netflix needs to be prepared for that. In this project thesis a detailed analysis of the strengths weaknesses opportunities and threats of Netflix will be conducted. The special challenge for Netflix is to have a good plan as soon as the cable TV programmes try to attack. Different possibilities of offering better and more customer oriented content will be analysed. Will Netflix eventually replace the traditional television as we know it and become the number one provider for streaming services. This project thesis will analyse the current situation and in the end a recommendation for Netflix future will be given.

Strategic Management Analysis of FedEx Oluwagbenga Afolabi, 2018-08-27 Seminar paper from the year 2018 in the subject Business economics Business Management Corporate Governance grade 100 00 Saint Leo University language English abstract The need for the services of logistic companies has experienced a geometric increase in recent times fueled by the spike in online shopping Our company focus on this strategic analysis is the Federal Express FedEx established on April 17 1973 by W Smith a Yale graduate However logistic companies have not been able to meet up with the demand for their services because they lack the capacity to fulfill these deliveries This is largely due to the firm s limited resources and unpreparedness for such geometric increase for parcel delivery Even though the company was not able to meet all its scheduled parcel deliveries the firm still recorded a substantial gain in 2017 the majority of which came from ground delivery Therefore our strategic plan includes repositioning the FedEx ground delivery service to capture this externality and increase ground delivery services revenue by 20 percent Using the EFE and IFE matrices we determined that Amazon accounts for about half or 53 percent of the United States online sales Although the company is entering the logistics business we believe the rate of shop and ship commerce will double that of last year However the existing system is not capable of meeting the demand for on time delivery especially during the peak period To address the above problem we recommended a strategic alternative for FedEx based on the results of various strategical analysis tools used that converged to the same conclusion i e the need for FedEx to expand its ground delivery service Further this strategic alternative consists of opening new Hubs increasing ground delivery vehicles and delivery drivers However adopting these alternative strategies has its associated advantages and threats Some of the advantages of expanding its ground delivery system are for the firm to effectively capture the benefits of the spike in online purchases Furthermore opening more Pickup Delivery Stations and Hubs can ensure speed of shipment and delivery However one of the major impediments to this strategy is the cost associated with increasing its delivery fleets and drivers Therefore channeling a portion of the Tax cut windfall to purchasing

these vehicles and hiring new delivery drivers will yield a return on investment in the long run based on the result of the strategic analysis
