*Aspects and Issues in the History of Children's Literature* Maria Nikolajeva, 1995-06-13 The contributors to this collection of essays address children's literature as an art form rather than an educational instrument as has been the traditional approach Scholars from 10 different countries present a variety of approaches to the history of children's literature including views on sociological semiotic and intertextual models of its evolution Other issues explored include influence and interaction between stories and their countries of origin This strong presentation of international perspectives on children's literature will be a valuable resource for scholars of children's and comparative literature **Whose Story?** Maria González Davies, Riitta Oittinen, 2008 This book is based on the discussions carried out in two seminars on the translation of children

TM's literature coordinated by Maria González Davies and led by Riitta Oittinen. The main focus finally revolved around four questions: a) Tackling the challenges posed by translating children's literature, both picturebooks and books with illustrations; b) the range of strategies available to solve specific issues; c) the special characteristics involved in reading aloud, its emotional dimension, and the sphere it occupies between private and public reading; d) the interpretation and manipulation of child images; and e) the role of the translator, publishers, and mediators as active or passive agents whose decisions may finally mirror the images projected by the authors of the source books. This volume is also professionally oriented and presents examples that underline the interaction between theory and practice. The topics range from Bible translation to translating the classics such as Beatrix Potter's tales and fairytales, fantasy worlds for young adults as depicted in Tolkien's *The Lord of the Rings*, or novels such as those by Christine Nostlinger, as well as stories with a psychological and social function such as the African war tales. Finally, it includes didactic applications that help enhance an awareness of the issues involved.

*Children's Literature in Translation* Jan Van Coillie, Jack McMartin, 2020-10-30. For many of us, our earliest and most meaningful experiences with literature occur through the medium of a translated children's book. This volume focuses on the complex interplay that happens between text and context when works of children's literature are translated: what contexts of production and reception account for how translated children's books come to be made and read as they are? How are translated children's books adapted to suit the context of a new culture? Spanning the disciplines of Children's Literature Studies and Translation Studies, this book brings together established and emerging voices to provide an overview of the analytical, empirical, and geographic richness of current research in this field and to identify and reflect on common insights, analytical perspectives, and trajectories for future interdisciplinary research. This volume will appeal to an interdisciplinary audience of scholars and students in Translation Studies and Children's Literature Studies and related disciplines. It has a broad geographic and cultural scope, with contributions dealing with translated children's literature in the United Kingdom, the United States, Ireland, Spain, France, Brazil, Poland, Slovenia, Hungary, China, the former Yugoslavia, Sweden, Germany, and Belgium.

**The Role of Translators in Children's Literature** Gillian Lathey, 2010-09-13. This book offers a historical analysis of key classical translated works for children, such as writings by Hans Christian Andersen and Grimm's tales. Translations dominate the earliest history of texts written for children in English, and stories translated from other languages have continued to shape its course to the present day. Lathey traces the role of the translator and the impact of translations on the history of English language children's literature from the ninth century onwards. Discussions of popular texts in each era reveal fluctuations in the reception of translated children's texts, as well as instances of cultural mediation by translators and editors. Abridgement, adaptation, and alteration by translators have often been viewed in a negative light, yet a closer examination of historical translators' prefaces reveals a far

more varied picture than that of faceless conduits or wilful censors From William Caxton's dedication of his translated History of Jason to young Prince Edward in 1477 to thentent he may begynne to lerne read Englissh to Edgar Taylor's justification of the first translation into English of Grimms tales as a means of promoting children's imaginations in an age of reason translators have recorded in prefaces and other writings their didactic religious aesthetic financial and even political purposes for translating children's texts

This book offers fresh critical insights to the field of children's literature translation studies by applying the concept of transcreation established in the creative industries of the globalized world to bring to the fore the transformative transgressional and creative aspects of rewriting for children and young audiences This socially situated and culturally dependent practice involves ongoing complex negotiations between creativity and normativity balancing text related problems and genre conventions with readers expectations constraints imposed by established canonical translations and publishers demands Focussing on the translator's strategies and decision making process the book investigates phenomena where transcreation is especially at play in children's literature such as dual address ambiguity nonsense humour play on words and other creative language use these also involve genre specific requirements for example rhyme and rhythm in poetry The book draws on a wide range of mostly Anglophone texts for children and their translations into languages of limited diffusion to demonstrate the numerous ways in which information meaning and emotions are transferred to new linguistic and cultural contexts While focussing mostly on interlingual transfer the volume analyses a variety of translation types from established canonical renditions by celebrity translators to non professional translations and intralingual rewritings It also examines iconotextual dynamics of text and image The book employs a number of innovative methodologies from cognitive linguistics and ethnolinguistics to semiotics and autoethnographic approaches going beyond text analysis to include empirical research on children's reactions to translation strategies Highlighting the complex dynamics at work in the process of transcreating for children this volume is essential reading for students and researchers in translation studies children's fiction and adaptation studies
