Proceedings of the International Conference on Strategic and Global Studies (ICSGS 2024) Ibrahim Kholilul Rohman, Wu Zhaoyang, Mohammad Izdiyan Muttaqin, Ismail Suardi Wekke, Irene Sondang Fitrinitia, 2025-01-31 This is an open access book The pandemic turned to endemic has pushed many countries in the world to digitalize almost all sectors in order to accelerate the development Every crisis moments create momentum of opportunity to revive and reawaken the hidden potencies of nations Instead of given thought about the digital culture the social changes rapidly occurred The discourses of digital security cyber threats monetization crypto currency big data internet of things IoT artificial intelligence AI and social media had taken us concern about future generations The very existence of AI application distorts the academic world too where the difference of human and bot could hardly determine Chat GPT also opened academic eyes where the human analytics skill would perish against the advancement of technology that could provide more precise answers despite lack of wisdom Alipay has turned MSMEs to wider market and reach even small villagers to allow opportunity reach them Gojek eases the burden of stagnancy in making affordable and comfortable public transportation where at the same time reduce the traffic frequency Would everyone be fitted with the recent situation or still some country left behind Whereas for some parts of the world the very basic needs like electricity elementary education clean water healthy food and secure shelter are still luxurious and hard to access for certain part of the world The gap disparity remains and recent world order is not everyone s favor or answer for all problems Meanwhile the attack of HAMAS to the Israeli shocked the world when the Operation Aqsa Flood launched in 7th of October 2023 days gone by the casualties mounted and the psychology of Palestinian disturbed to the extent incurable Worse things worst Iran retaliates Israel after the attack to its consulate in Syria The international society and global politics failed to show solidarity amidst the humanitarian catastrophe in Palestine where Western alliance continuously rejected the cease fire in the UNGA The US as the global power failed to show its quality as the world leader which prove the political constellation moved to the multipolarity The injustice still persists and the voice to transform world order in UN resonates The consequence lies on the transformation of global security where each nations pursue its own weaponization to ensure its national survival and well being in the face of uncertainty and unpredictable threats The opportunity arises in the sector of global halal industry The player is not only Muslim countries but non Muslim countries are taking part The industry expanded from food to banking and financial system as well as tourism and fashion Countless exhibition in regards with halal industry appeared and triggered more expansion in market as the global expense

in halal industry significantly increased This conference will become the melting pot of brilliant idea and push forward the solution to the global problem by making strategic decision into useful resource for all to solve the matters

Energy
Pardeep Singh, Suruchi Singh, Gaurav Kumar, Pooja Baweja, 2021-09-14 Energy Global energy demand has more than doubled since 1970 The use of energy is strongly related to almost every conceivable aspect of development wealth health nutrition water infrastructure education and even life expectancy itself are strongly and significantly related to the consumption of energy per capita Many development indicators are strongly related to per capita energy consumption Fossil fuel is the most conventional source of energy but also increases greenhouse gas emissions The economic development of many countries has come at the cost of the environment However it should not be presumed that a reconciliation of the two is not possible The nexus concept is the interconnection between the resource energy water food land and climate Such interconnections enable us to address trade offs and seek synergies among them Energy water food land and climate are essential resources of our natural environment and support our quality of life Competition between these resources is increasing globally and is exacerbated by climate change Improving resilience and securing resource availability would require improving resource efficiency Many policies and programs are announced nationally and internationally for replacing the conventional mode and also emphasizing on conservation of fossil fuels and reuse of exhausted energy so a gap in implications and outcomes can be broadly traced by comparing the data This book aims to highlight problems and solutions related to conventional energy utilization formation and multitudes of ecological impacts and tools for the conservation of fossil fuels The book also discusses modern energy services as one of the sustainable development goals and how the pressure on resource energy disturbs the natural flows The recent advances in alternative energy sources and their possible future growth are discussed and on how conventional energy leads to greenhouse gas formation which reduces energy use efficiency The different policies and models operating is also addressed and the gaps that remained between them Climate change poses a challenge for renewable energy and thus it is essential to identify the factors that would reduce the possibility of relying on sustainable energy sources This book will be of interest to researchers and stakeholders students industries NGOs and governmental agencies directly or indirectly associated with energy research
