Hertzfeld,Benjamin Staats,George Leaua,World Intellectual Property Organization,2022-04-05 Human exploration of outer  
space has stimulated multiple innovations from both government and private sources The decision to invest vast sums of  
money over a short period of time for the moon programs of the 1960s radically increased the level of innovation  
Accomplishing this required new forms of energy for launch and space operations reductions in the weight of components  
and advanced computational capabilities among many other technological improvements The organization and management  
of bringing all of the components together was also essential This report discusses economic aspects and overall benefits of  
those innovations as they fit into the prior and continuing push for advanced space capabilities      Chariots for Apollo
