Applying Behavioural Sciences To Eu Policy Making:

Applying Behavioural Sciences to EU Policy-making René Bavel (van), Benedikt Herrmann, Gabriele Esposito, Antonios Proestakis, Institute for Prospective Technological Studies, 2013

Private Law, Nudging and Behavioural Economic Analysis Antonios Karampatzos, 2020-01-14 Offering a fresh perspective on nudging this book uses legal paternalism to explore how legal systems may promote good policies without ignoring personal autonomy It suggests that the dilemma between inefficient opt in rules and autonomy restricting opt out schemes fails to realistically capture the span of options available to the policy maker There is a third path namely the mandated choice model The book is mainly dedicated to presenting this model and exploring its great potential Contract law consumer protection products safety and regulatory problems such as organ donation or excessive borrowing are the setting for the discussion Familiarising the reader with a hot debate on paternalism behavioural economics and private law this book takes a further step and links this behavioural law and economics discussion with philosophical considerations to shed a light on modern challenges such as organ donation or consumers protection by adopting an openly interdisciplinary approach The book will be of interest to students and scholars of contract law legal systems behavioural law and economics and consumer law The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution NonCommercial NoDerivatives CC BY NC ND 4 0 license

The Behavioural Finance Revolution Riccardo Viale, Shabnam Mousavi, Barbara Alemanni, Umberto Filotto, 2018 Financial markets are complex Regulators strive to predict ways in which they can malfunction and create rules to prevent this from happening yet behavioural impacts are often overlooked This book explores how behavioural finance can go hand in hand with traditional methods to help banks and regulators create better policies It also demonstrates how the behavioural finance revolution has opened the way to a more integrated approach to the analysis of economic phenomena

Nudge and the Law Alberto Alemanno, Anne-Lise Sibony, 2015-09-24 Behavioural sciences help refine our understanding of human decision making Their insights are immensely relevant for policy making since public intervention works much better when it targets real people rather than imaginary beings assumed to be perfectly rational Increasingly governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy health financial services and data protection When policy making meets behavioural sciences effective and low cost regulations can emerge in the form of default rules smart disclosure and simplification requirements While behaviourally informed intervention has a huge potential for policymaking it also attracts legitimacy and practicability concerns Nudge and the Law takes a European perspective on those issues and explores the legal implications of the emergent phenomenon of behavioural regulation by focusing on the challenges and opportunities it may offer to EU policy making and beyond

Empirics and Consumer Law in Changing Markets Gitta Veldt, Kimia Heidary, Vanessa Mak, 2025-08-11 This book evaluates the impact of empirical

research on regulation in contemporary consumer markets It combines findings from a breadth of disciplines focusing on their implications for legal frameworks and policies Bringing together leading experts in the field the book translates empirical insights into policies and explores digitalization in the consumer law domain This title contains one or more Open Access chapters [The Law of Good People](#) Yuval Feldman,2018-06-07 This book argues that overcoming people s inability to recognize their own wrongdoing is the most important but regrettably neglected area of the behavioral approach to law

Regulatory Policy and Behavioural Economics Pete Lunn,2014 Over the past five years behavioural economics has been rapidly propelled from the margins of economic analysis towards the policy mainstream In this context this study offers an international review of the initial applications of behavioural economics to policy with a particular focus on regulatory policy It describes the extent to which behavioural findings have begun to influence public policy in a number of OECD countries referring to a total of more than 60 instances the majority of which concern regulatory policy [Noise & Health](#) ,2005 *Annual Report JRC* European Commission.
