Archeologia Subacquea:

International Handbook of Underwater Archaeology Carol V. Ruppe, Jane F. Barstad, 2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs *Eighth International Symposium "Monitoring of Mediterranean Coastal Areas. Problems and Measurement Techniques" Livorno (Italy) June 2020* Laura Bonora, Donatella Carboni, Matteo De Vincenzi, 2022-10-14 The 8th International Symposium Monitoring of Mediterranean Coastal Areas Problems and Measurements Techniques was organized by CNR IBE in collaboration with FCS Foundation and Natural History Museum of the Mediterranean and under the patronage of University of Florence Accademia dei Geografi Tuscany Region and Livorno Province It is the occasion in which scholars can illustrate and exchange their activities and innovative proposals with common aims to promote actions to preserve coastal marine environment Considering Symposium interdisciplinary nature the Scientific Committee underlining this holistic view of Nature decided to celebrate Alexander von Humboldt a nature scholar that proposed the organic and inorganic nature's aspects as a single system It represents a sign of continuity considering that in presence Symposium could not be carried out due to the COVID 19 pandemic restrictions Subjects are related to coastal topics morphology flora and fauna energy production management and integrated protection geography and landscape cultural heritage and environmental assets legal and economic aspects *Urban and Rural Life in Roman Sardinia* Attilio Mastino, 2025-12-17 The work aims to present the history of ancient Sardinia no longer understood as a peripheral closed and poor island but as one of the provinces most inserted in the Roman ecumene a land according to Polybius vast populous and fertile The volume collects and summarizes the heritage of research and scientific commitment carried out in recent decades the result of projects of increasingly international scope and increasingly technologically advanced research methodologies The work benefits from the long collaboration with Joyce Reynolds and explores the boundary between change and continuity starting from the possible quadripartition of the sub provincial territory between the main cities Carales Tharros Turrus Libisonis Olbia It addresses the theme of the ancient landscape in a rural setting between Roman and Barbaria And then the economic and social aspects the relationship between history and geography the large estates for community use the land registry the farms entrusted to the colonists the possession by important senatorial families the roads the bridges the milestones the contribution of the Sardinians to the army legions and auxiliary units and war fleet There are many new features and a very up to date bibliography The aim of this volume is to demonstrate that the Roman legacies profoundly influence the plural identity of today's Sardinia an expression of a long history that in

some way also conditions contemporary society Roman Amphora Contents: Reflecting on the Maritime Trade of Foodstuffs in Antiquity (In honour of Miguel Beltrán Lloris) Darío Bernal-Casasola, Michel Bonifay, Alessandra Pecci, Victoria Leitch, 2021-11-04 Presents the results of the RACIIC International Congress Roman Amphora Contents International Interactive Conference C diz 2015 dedicated to the distinguished Spanish amphorologist Miguel Beltrán Lloris This volume aims to reflect on the current state of knowledge about the palaeocontents of Roman amphorae **SOMA 2024: Proceedings of the 25th Symposium on Mediterranean Archaeology** Mladen Pešić, Luka Bratović, Doris Kurtov, 2025-11-27 The Roman Remains of South West France is a richly illustrated guide to over 100 sites detailing Roman cities baths villas pottery kilns and museums It explores key features like terra sigillata production and Gallic resistance offering historical insights and practical reasons to visit An Indexed Bibliography of Underwater Archaeology and Related Topics John Sherwood Illsley, 1996 This volume is an indexed bibliography of underwater archaeology and related topics It covers a range of subjects including shipbuilding and naval architecture underwater archaeology artefacts conservation and archaeological sites Archeologia subacquea - Come opera l'archeologo sott'acqua. Storie dalle acque. VIII Ciclo di Lezioni sulla ricerca applicata in Archeologia (Certosa di Pontignano 1996) Giuliano Volpe, 1998-09-01 Il volume riporta gli interventi del VIII Ciclo di Lezioni organizzato dall'Università di Siena sulla Ricerca applicata in Archeologia I testi riescono a riassumere la complessità dell'archeologia subacquea l'ampiezza e l'articolazione di temi e di problemi affrontati la variabilità degli ambienti e dei contesti in cui la ricerca si svolge di fatto unificati solo dall'unico comune denominatore costituito dall'acqua Quindi non solo archeologia sottomarina ma archeologia subacquea tout court dei fiumi dei laghi degli insediamenti sommersi dei porti archeologia e architettura navale ecc il tutto con un ampio spettro cronologico dalla preistoria all'età moderna Le sezioni in cui articolato il volume consentono di approfondire da un lato la situazione sui fondamenti e sullo stato della disciplina l'approfondimento del suo statuto teorico e l'analisi delle procedure delle metodologie e delle tecniche impiegate dall'altro l'analisi dell'uso storico dei dati acquisiti nel corso delle ricerche archeologiche e infine gli aspetti legislativi e tecnico burocratici **Underwater Archaeology** Gordon P. Watts, 1981 *Building for Eternity* C.J. Brandon, R.L. Hohlfelder, M.D. Jackson, J.P. Oleson, 2014-08-29 One marker of the majesty of ancient Rome is its surviving architectural legacy the stunning remains of which are scattered throughout the circum-Mediterranean landscape Surprisingly one truly remarkable aspect of this heritage remains relatively unknown There exists beneath the waters of the Mediterranean the physical remnants of a vast maritime infrastructure that sustained and connected the western world's first global empire and economy The key to this incredible accomplishment and to the survival of structures in the hostile environment of the sea for two thousand years was maritime concrete a building material invented and then employed by Roman builders on a grand scale to construct harbor installations anywhere they were needed rather than only in locations with advantageous geography or topography This book explains how the Romans built so successfully in the sea with their

new invention The story is a stimulating mix of archaeological geological historical and chemical research with relevance to both ancient and modern technology It also breaks new ground in bridging the gap between science and the humanities by integrating analytical materials science history and archaeology along with underwater exploration The book will be of interest to anyone interested in Roman architecture and engineering and it will hold special interest for geologists and mineralogists studying the material characteristics of pyroclastic volcanic rocks and their alteration in seawater brines The demonstrable durability and longevity of Roman maritime concrete structures may be of special interest to engineers working on cementing materials appropriate for the long term storage of hazardous substances such as radioactive waste A pioneering methodology was used to bore into maritime structures both on land and in the sea to collect concrete cores for testing in the research laboratories of the CTG Italcementi Group a leading cement producer in Italy the University of Berkeley and elsewhere The resulting mechanical chemical and physical analysis of 36 concrete samples taken from 11 sites in Italy and the eastern Mediterranean have helped fill many gaps in our knowledge of how the Romans built in the sea To gain even more knowledge of the ancient maritime technology the directors of the Roman Maritime Concrete Study ROMACONS engaged in an ambitious and unique experimental archaeological project the construction underwater of a reproduction of a Roman concrete pier or pila The same raw materials and tools available to the ancient builders were employed to produce a reproduction concrete structure that appears to be remarkably similar to the ancient one studied during ROMACONS fieldwork between 2002 2009 This volume reveals a remarkable and unique archaeological project that highlights the synergy that now exists between the humanities and science in our continuing efforts to understand the past It will quickly become a standard research tool for all interested in Roman building both in the sea and on land and in the history and chemistry of marine concrete The authors also hope that the data and observations it presents will stimulate further research by scholars and students into related topics since we have so much more to learn in the years ahead
