Atelier Bow Wow A Primer

**Diego Garcia-Setien, Enrique
Espinosa, Begona de Abajo, Almudena
Ribot / CoLaboratorio**

Atelier Bow Wow A Primer:

Atelier Bow-Wow Atorie Wan,Laurent Stalder,2013 The Tokyo based architecture firm Atelier Bow Wow founded in 1992 by Yoshiharu Tsukamoto and Momoyo Kaijima is among the most admired architecture practices of today Part of a whole generation of Japanese firms that seized the recession of the early 1990s as an opportunity to develop a new design practice in response to changed planning and social conditions Atelier Bow Wow is well known for its domestic and cultural architecture as well as its research exploring micro architecture The firm s first studies focused on anonymous Tokyo buildings and highlighted the ways in which they met the requirements of residents and visitors Additionally founders Tsukamoto and Kaijima devised a particular type of residential building for Tokyo a small scale house that offers an ideal solution to the restrictions of the densely populated megacity This publication unifies Atelier Bow Wow s architectural and theoretical work

Hypersexual City Nicole Kalms,2017-03-31 Much of feminist architectural scholarship focuses on the enormous task of instating women s experience of space into spatial praxis Hypersexual City The Provocation of Soft Core Urbanism suggests this attention to women s invisibility in sociocultural space has overlooked the complex ways in which women already occupy space albeit mostly as an image or object to be consumed even purchased It examines the occupation of urban space through the mediated representation of women s hypersexualized bodies A complex transaction proliferates in the commercial urban space of cities this book seeks to address the cause and consequence of the increasing dominance of gendered representation It uses architectural case studies and analysis to make visible the sexual politics of architecture and urbanism and in doing so reveal the ways that heterosexist culture shapes the spaces behaviour and relationships formed in neoliberal cities Hypersexual City announces how examining urbanism that operates through and is framed by sexual culture can demonstrate that architecture does not merely find itself adrift in the hypersexualized landscape of contemporary cities but is actively producing and contributing to the sexual regulation of urban life

Participatory Design Theory Oswald Devisch,Liesbeth Huybrechts,Roel De Ridder,2018-10-03 In recent years many countries all over Europe have witnessed a demand for a more direct form of democracy ranging from improved clarity of information to being directly involved in decision making procedures Increasingly governments are putting citizen participation at the centre of their policy objectives striving for more transparency to engage and empower local individuals and communities to collaborate on public projects and to encourage self organization This book explores the role of participatory design in keeping these participatory processes public It addresses four specific lines of enquiry how can the use and or development of technologies and social media help to diversify to coproduce to interrupt and to document democratic design experiments Aimed at researchers and academics in the fields of urban planning and participatory design this book includes contributions from a range of experts across Europe including the UK Belgium the Netherlands Italy Denmark Austria Spain France Romania Hungary and Finland

Supertight Graham Crist,John Doyle,2021-12-27 Supertight is an exploration of high density urban life and reducing the

footprint of cities through adaptations in design and behavior Tightness is a positive urban quality examined through the observations of designers with a focus on the cities of Asia The rapidly growing large cities of Asia are critical to understanding our future footprint Asian cities provide insights into new ways of being densely urbanised The by product of this unprecedented metropolitan convergence will be the emergence of new urbanisms and new architectures new models for living and making culture The Supertight refers to the small intense robust and hyper condensed spaces that emerge as a by product of extreme levels of urban density Tightness arises as consequence of density but tightness itself is not density Tightness is a series of social economic and cultural practices that have developed in cities as a response to the rapid growth and consolidation of cities While architectural models of density have been heavily explored this project investigates the culture of tightness that has emerged in Asian cities over the past thirty years and the role that designers play in the material and social behaviours of tightness To be tight is to be small and constrained but also to be open to the economies and social intimacy of being close Ultimately this project aims to unpack and convey both the delight and difficulty that emerges through the close occupation of large cities With Contributions of Yoshiharu Tsukamoto Atelier Bow wow Atelierco Rafael A Balboa with Yasemin Sahiner Sanuki Daisuke Drawing Architecture Studio Desiree Grunewald Sue Hajdu Tohru Horiguchi Alban Mannisi Yazid Ninsalam Charles Anderson Minsuk Cho Mass Studies New Office Works Archie Pizzini Andrew Stiff Superimpose Taishin Shiozaki Shiozaki Lab WOHA **Post DomestiCity** Diego Garcia-Setien, Enrique Espinosa, Begona de Abajo, Almudena Ribot / CoLaboratorio, 2022-07-06 PostDomestiCity is an inquiry and speculative exercise into the conditions of obsolescence in the post industrial city from a contemporary perspective Working with three paradigmatic cases that were conceived from industrial logics the Packard plant in Detroit Lima s PREVI neighbourhood and the Grand Mare complex in Rouen we explore alternative ways of reusing reprogramming and redensifying the built environment as alternatives to demolition Relevant voices in the field of architecture share their approaches and visions of the future for the pre existing city helping us imagine post domesticity in the current climate crisis and socio technological context With Contributions of Anne Lacaton Marina Otero Ippolito Pestellini Duplex Architects Lacol Antonio V zquez de Castro Carmen Espejel Luis Takahashi Lys Villalba O F architects DABG Patricia Lucas Ram n Araujo Paulo Dam Renato Manrique CoLaboratorio Diego Garc a Seti n Enrique Espinosa Bego a de Abajo Almudena Ribot Seeing and Making in Architecture Taiji Miyasaka, 2013-08-22 You always aim to achieve that moment of insight that leads to ingenuity and novelty in your design but sometimes it remains elusive This book presents a variety of techniques for mapping and making hands on design build projects and relates this work to real architecture It helps you to learn new ways of seeing and making that will enhance your creative design process and enable you to experience moments that lead to ingenuity in design Each of the book s two parts Seeing and Making is organized according to technique which ranges from quantitative analysis and abstraction to pattern and scale to provide you with a framework for mapping and hands on exercises Interviews with architects Yoshiharu

Tsukamoto Atelier Bow Wow and Jesse Reiser and Nanako Umemoto Reiser Umemoto give you perspective on using these exercises in practice

Strategies for Landscape Representation Paul Cureton, 2016-12-08 Strategies for Landscape Representation discusses a variety of digital and analogue production techniques for the representation of landscape at multiple scales Careful consideration is required to represent time and to ensure accuracy of representation and evaluation in the landscape Written as a guide for making appropriate selection of a wide variety of visualisation tools for students and built environment professionals with an interest in landscape the book charts emerging technologies and historical contexts whilst also being relevant to landscape legislation such as Building Information Modelling BIM and Landscape Assessment This book is an innovation driven text that encourages readers to make connections between software technology and analogue modes The management choice and combination of such modes can arguably narrow the unknown of landscape character address the issues of representing time and change in landscape and engage and represent communities perceptions and experience of landscape Showcasing international examples from landscape architecture planning urban design and architecture artists visualisers geographers scientists and model makers the vitality of making and intrinsic value of representational work in these processes and sites is evidenced An accompanying companion website provides access to original source files and tutorials totalling over a hundred hours in mapping and GIS diagrams and notation photomontage 3D modelling and 3D printing

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine

Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design

The Architectural Index ,2000 Arquitectura viva ,2005 **The Art of Participation** Rudolf Frieling, San Francisco Museum of Modern Art, 2008-10-28 The first fully illustrated survey of participatory art and its key practitioners published in association with the San Francisco Museum of Modern Art This new survey covers the rich and varied history of participatory art from early happenings and performances to current practices that demand audience interaction As the hallmarks of Web 2.0 browsing sharing collecting producing increasingly permeate every aspect of society this timely project reveals the ways

in which artists and viewers have approached the creation of open works of art The featured artists include Marina Abramovic and Ulay Vito Acconci Joseph Beuys John Cage Janet Cardiff Lygia Clark Kit Galloway and Sherrie Rabinowitz Dan Graham Hans Haacke Allan Kaprow Lynn Hershman Leeson Antoni Muntadas Yoko Ono Nam June Paik and Erwin Wurm Original essays by Rudolf Frieling Boris Groys Robert Atkins and Lev Manovich identify seminal moments in participatory practice from the 1950s to the present day A rich array of plates introduce work by all the artists in the accompanying exhibition with reproductions of significant projects by other major figures from Helio Oiticica Joan Jonas and Gordon Matta Clark to Rirkrit Tiravanija and SUPERFLEX rounding out the survey
