### DESCRIPTION

The Corvair Powerglide transmission is a four-speed manual transmission. It is designed to provide smooth shifting and efficient power transfer from the engine to the rear axle. The transmission consists of a housing, input shaft, output shaft, and various gears. The input shaft is connected to the engine, and the output shaft is connected to the rear axle. The gears are arranged in a planetary configuration, allowing for smooth shifting between the four forward gears and reverse.

### MAINTENANCE

Adding Oil  
The Corvair Powerglide transmission requires regular oil changes to ensure proper lubrication and smooth operation. The recommended oil is a high-quality motor oil with a viscosity of 75W-90. The oil level should be checked regularly, and the oil should be changed at the intervals specified in the maintenance schedule. The oil is located in the bottom of the transmission housing, and it can be accessed through a drain plug. The oil should be drained completely and replaced with fresh oil.
