Industrial Revolution in the United States: powered by steamboats on rivers	
1. What were some important inventions that revolutionized the cotton trade in the United States?	Improvements include the use of steel, cast-iron, brass, and other metals; and a revolution in textile mills that all provided mechanized power and automation.
2. What factors led to the great expansion of U.S. industry in the late 1800s?	These factors were improved industrial plants for the late 1800s and improved metal machinery, steel, iron, and technology (like the telegraph, electricity, steam, and the technological advances that powered and drove America's government, private, national, and local economies in the late 1800s and early 1900s).
Industrial Revolution: powered by steamboats on rivers	
3. How were Americans able to exploit the development of technology in Europe?	A major technological advance that was used and adapted to American industry, agriculture, and transportation.
4. How did the transportation and communication industry revolutionize Europe during the early 1800s?	The importance of railway technology during the industrial revolution in other parts of Europe led to the use of a railway system in the United States. This was an important step through industrial growth and the technological revolution.
