Chapter 8 Ten Words In Context:

Cloze and Coherence John W. Oller, Jon Jonz, 1994 Cloze procedure is a family of testing and teaching methods that leave blanks in discourse and ask examinees to restore the missing elements Edited and coauthored by award winning scholars Cloze and Coherence shows how and why cloze procedure is sensitive to discourse constraints and it offers a comprehensive theory of semiotics showing what coherence is and reviewing a great deal of cloze research It traces in particular the history of cloze research pertaining to studies of coherence from Hermann Ebbinghaus in the 1890s to Wilson L Taylor in the 1950s until today The research presented here aims to show that cloze scores tend to fall if discourse constraints are disrupted Also explored are many subtle questions associated with this tendency Populations discussed include native and nonnative speakers of English native and nonnative speakers of French and certain special populations such as deaf subjects and educable mentally retarded subjects Contrary to some experts it appears from the theory and the research that all of the normal subject populations as well as the special populations examined here benefit from the cognitive momentum gained from the episodic organization of ordinary discourse This finding is sustained by research from Taylor Oller et al Cziko Bachman Jonz and Taira Further some of Jonz s recent work shows why scrambling encyclopedic text Timothy Shanahan and colleagues failed to produce any significant decrement in cloze scores Jonz demonstrated empirically that some texts just as Gary A Cziko had predicted are not made more difficult by scrambling their sentences because the sentences of those texts are in some cases arranged in the manner of a list rather than a logically or chronologically structured series Scrambling the list therefore has no significant impact The final chapter of this study gives a comprehensive review of research reportedly showing that cloze is not sensitive to coherence The authors show that all those efforts suffer from fatal flaws Cloze and Coherence offers advances of two kinds First a better theoretical basis for experimental research on discourse comprehension and on literacy and language acquisition is presented which stems from a fleshed out semiotic theory Second experimental advances whose results are published here for the first time appear in various studies by Jonz Chihara et al Oller et al and Taira This work is well researched and illustrated It includes figures tables appendices a glossary and an index It will be a valuable tool for language and literacy testers and teachers

The Old Testament John Holdsworth, 2005 This SCM Study Guide to the Old Testament guides the newcomer to Old Testament studies easily and smoothly through the myriad of interpretations of this ancient text Explaining difficult concepts and ensuring space for the reader to reflect independently on topics throughout this accessible textbook is aimed specifically at those who want to make connections between their own experience and the Old Testament text in a way which enables each to be transformed by the other It provides the reader with matter to reflect upon and presents Biblical text in a way that makes reflection and understanding possible

Genders and Classifiers Aleksandra Iļūvīr'evna Aikhenval'd, Alexandra Y. Aikhenvald, Elena Mihas, 2019 This volume offers a comprehensive account of the typology of noun classification across the world s languages Following a

detailed introduction to noun categorization the chapters in the volume provide in depth studies of genders and classifiers of different types in a range of South American and Asian languages and language families

Microcontrollers Julio Sanchez, Maria P. Canton, 2018-10-08 Focusing on the line of high performance microcontrollers offered by Microchip Microcontrollers High Performance Systems and Programming discusses the practical factors that make the high performance PIC series a better choice than their mid range predecessors for most systems However one consideration in favor of the mid range devices is the abundance of published application circuits and code samples This book fills that gap Possibility of programming high performance microcontrollers in a high level language C language Source code compatibility with PIC16 microcontrollers which facilitates code migration from mid range to PIC18 devices Pin compatibility of some PIC18 devices with their PIC16 predecessors making the reuse of PIC16 controllers in circuits originally designed for mid range hardware possible Designed to be functional and hands on this book provides sample circuits with their corresponding programs It clearly depicts and labels the circuits in a way that is easy to follow and reuse Each circuit includes a parts list of the resources and components required for its fabrication The book matches sample programs to the individual circuits discusses general programming techniques and includes appendices with useful information

Genders and Classifiers Alexandra Y. Aikhenvald, Elena I. Mihas, 2019-08-22 This volume offers a comprehensive account of the typology of noun classification across the world s languages Every language has some means of categorizing objects into humans or animates or by their shape form size and function The most widespread are linguistic genders grammatical classes of nouns based on core semantic properties such as sex female and male animacy humanness and also shape and size Classifiers of several types also serve to categorize entities Numeral classifiers occur with number words possessive classifiers appear in the expressions of possession and verbal classifiers are used on a verb categorizing its argument These varied sorts of genders and classifiers can also occur together This volume elaborates on the expression usage history and meanings of noun categorization devices exploring their various facets across the languages of South America and Asia which are known for the diversity of their noun categorization The volume begins with a typological introduction that outlines the types of noun categorization devices and their expression scope functions and development as well as sociocultural aspects of their use The following nine chapters provide in depth studies of genders and classifiers of different types in a range of South American and Asian languages and language families including Arawak languages Zamucoan Hmong and Japanese
