Gary E Kessler Studying Religion 3rd Edition:

    Studying Religion Gary E. Kessler,2005-06 Through the use of thought provoking case studies summaries and review questions this introductory level text shows students how to engage in the academic study of religion and helps instructors address some of the typical problems they encounter when introducing students to the study of religion Kessler guides students through an unbiased and varied study of religious beliefs and practices such as sacred power myths and rituals religious art the problem of evil and the relationship between religion and morality The text also addresses issues of gender and religious institutionalization   <u>Religion and Science Fiction</u> James H. Thrall,2024-05-17 Religion and Science Fiction An Introduction guides students into deeper understanding of how religion and science fiction engage often overlapping questions This textbook introduces key ideas of religious studies through critical consideration of print and visual media that fall within the general category of science fiction The goal throughout is to help students move beyond simply identifying points of interrelation between religious studies and forms of what is often called more broadly speculative fiction to considering how the studied texts open new ways of thinking about human and nonhuman experience taken to be religious With discussion questions lists of key terms extensive additional resources and suggestions for projects and essay questions this book is a foundational text for students and instructors of religion and science fiction   *Teaching African American Religions* Carolyn M. Jones,Theodore Louis Trost,2005-07-14 The variety and complexity of its traditions make African American religion one of the most difficult topics in religious studies to teach to undergraduates The sheer scope of the material to be covered is daunting to instructors many of whom are not experts in African American religious traditions but are called upon to include material on African American religion in courses on American Religious History or the History of Christianity Also the unfamiliarity of the subject matter to the vast majority of students makes it difficult to achieve any depth in the brief time allotted in the survey courses where it is usually first encountered The essays in this volume will supply functional innovative ways to teach African American religious traditions in a variety of settings   *Ninian Smart on World Religions: Traditions and the challenges of modernity. I. Individual traditions. Buddhism. 'Mysticism and scripture in Theravāda Buddhism'* Ninian Smart,2009 Ninian Smart came to public prominence as the founding Professor of the first British university Department of Religious Studies in the late 1960s His pioneering views on education in religion proved hugely influential at all levels from primary schools to academic teaching and research An unending string of publications many of them accessible to the general public sustained a reputation that became worldwide Here for the first time a selection of Ninian Smart s wide ranging writings is organised systematically under a set of categories which both comprehend and also illuminate his varied output over a career spanning half a century The editor John Shepherd was Principal Lecturer in Religion and Philosophy at the University of Cumbria He first met Smart as a postgraduate student and recently helped establish the Ninian Smart Archive at the University of Lancaster   **Understanding New Religious**

Movements John A Saliba,2004-09-08 Discussions of any religion can easily raise passions But arguments tend to become even more heated when the religion under discussion is characterized as new Divisions around the study of new religious movements NRMs or cults or nontraditional or alternative or emergent religions are so acute that there is even controversy over what to call them John Saliba strives to bring balance to these discussions by offering perspectives on new religions from different academic perspectives history psychology sociology law theology and counseling This approach provides rich descriptions of a broad range of movements while demonstrating how the differing aims of the disciplines can create much of the controversy around NRMs The new second edition has been updated and revised throughout and includes a new foreword by noted historian of religion J Gordon Melton For classes in religion or the social sciences or for interested individuals Understanding New Religious Movements offers the most objective introduction possible   Ninian Smart on World Religions John J.
