Fédération internationale du béton,2000-01-01 The former FIP Commission Prefabrication drafted the FIP Recommendations  
on the design of Precast prestressed hollow core floors published by FIP in 1988 Telford London ISBN 0 7277 1375 2 That  
document was highly appreciated by designers and public authorities because of the lack of guidance available elsewhere  
especially with respect to some specific features of the product for example the absence of transverse reinforcement It has  
also served as a reference guide for national standards and especially for the CEN product standard on prestressed hollow  
core slabs During the production of that report it was felt that some design rules were incomplete or missing In addition  
research carried out since has resulted in complementary knowledge on the behaviour of hollow core floors for example in  
combination with slender floor beams The present guide to good practice is intended to complement the existing  
recommendations The research for the different items was carried out at Chalmers University of Technology Sweden

Precast Concrete Structures Kim S. Elliott,2019-08-08 This second edition of Precast Concrete Structures introduces the conceptual design ideas for the prefabrication of concrete structures and presents a number of worked examples that translate designs from BS 8110 to Eurocode EC2 before going into the detail of the design manufacture and construction of precast concrete multi storey buildings Detailed structural analysis of precast concrete and its use is provided and some details are presented of recent precast skeletal frames of up to forty storeys The theory is supported by numerous worked examples to Eurocodes and European Product Standards for precast reinforced and prestressed concrete elements composite construction joints and connections and frame stability together with extensive specifications for precast concrete structures The book is extensively illustrated with over 500 photographs and line drawings

Design in Modular Construction Mark Lawson,Ray Ogden,Chris Goodier,2014-02-24 Modular construction can dramatically improve efficiency in construction through factory production of pre engineered building units and their delivery to the site either as entire buildings or as substantial elements The required technology and application are developing rapidly but design is still in its infancy Good design requires a knowledge of modular production installation and interface issues and also an understanding of the economics and client related benefits which influence design decisions Looking at eight recent projects along with background information this guide gives you coverage of generic types of module and their application vertical loading stability and robustness dimensional and spacial planning hybrid construction cladding services and building physics fire safety and thermal and acoustic performance logistical aspects such as transport tolerances and safe installation A valuable guide for professionals and a thorough introduction for advanced students

**Quality Function Deployment for Buildable and Sustainable Construction** Singhaputtangkul Natee,Sui Pheng Low,Evelyn A. L. Teo,2015-10-16 This book focuses on the implementation of Quality Function Deployment QFD in the construction industry as a tool to help building designers arrive at optimal decisions for external envelope systems with sustainable and buildable design goals In particular the book integrates special features into the conventional QFD tool to enhance its performance These features include a fuzzy multi criteria decision making method fuzzy consensus scheme and Knowledge Management System KMS This integration results in a more robust decision support tool known as the Knowledge based Decision Support System QFD KBDSS QFD tool As an example the KBDSS QFD tool is used for the assessment of building envelope materials and designs for high rise residential buildings in Singapore in the

early design stage The book provides the reader with a conceptual framework for understanding the development of the KBDSS QFD tool The framework is presented in a generalized form in order to benefit building professionals decision makers analysts academics and researchers who can use the findings as guiding principles to achieve optimal solutions and boost efficiency *UK National Annex to Eurocode 2* British Standards Institute Staff,2005-12-08 Buildings Structural design Structural systems Concretes Structures Design Reinforced concrete Prestressed concrete Precast concrete Factor of safety Durability Design calculations Prestressing steels Structural members Fire resistance Construction materials Safety measures Approval testing Serviceability limits Tendons Reinforcement Lightweight aggregates Aggregates **Designers' Handbook to Eurocode 2** A. W. Beeby,R. S. Modernisation, Mechanisation and Industrialisation of Concrete Structures Kim S. Elliott,Zuhairi Abd. Hamid,2017-05-01 Modernisation Mechanisation and Industrialisation of Concrete Structures discusses the manufacture of high quality

prefabricated concrete construction components and how that can be achieved through the application of developments in concrete technology information modelling and best practice in design and manufacturing techniques
