**Prozak Diaries** Orkideh Behrouzan, 2016-10-26 *Prozak Diaries* is an analysis of emerging psychiatric discourses in post 1980s Iran. It examines a cultural shift in how people interpret and express their feeling states by adopting the language of psychiatry and shows how experiences that were once articulated in the richly layered poetics of the Persian language became by the 1990s part of a clinical discourse on mood and affect. In asking how psychiatric dialect becomes a language of everyday, the book analyzes cultural forms created by this clinical discourse, exploring individual, professional, and generational cultures of medicalization in various sites from clinical encounters and psychiatric training to intimate interviews, works of art and media, and Persian blogs. Through the lens of psychiatry, the book reveals how historical experiences are negotiated and how generations are formed. Orkideh Behrouzan traces the historical circumstances that prompted the development of psychiatric discourses in Iran and reveals the ways in which they both reflect and actively shape Iranians' cultural sensibilities. A physician and an anthropologist, she combines clinical and anthropological perspectives in order to investigate the gray areas between memory and everyday life, between individual symptoms and generational remembering. *Prozak Diaries* offers an exploration of language as experience. In interpreting clinical and generational narratives, Behrouzan writes not only a history of psychiatry in contemporary Iran but a story of how stories are told.

**Re-envisioning Theoretical Psychology** Thomas Teo, 2019-05-29 This volume presents a re-envisioning of the field of theoretical psychology and offers unique visions for its present and future from leaders of North American philosophical psychology. It contends that theoretical psychology has reached middle age and must consider new directions to renew its growth. Rooted in a range of research traditions and the intellectual biographies of its authors, it paves the way toward this necessary revitalization of the content, activities, responsibilities, and hopes of theoretical psychology. The authors situate their analyses in the context of the increasing gap between alternative and mainstream and between the discipline and the profession of psychology. They demonstrate that changes in society, culture, and technology, the internationalization of the psychological humanities, and the cross-fertilization of intellectual innovations from other disciplines now afford possibilities for new orientations in theoretical psychology. The volume aims to do justice to psychological topics, human beings, and the intellectual problems that psychologists encounter while also providing space for meta-theoretical engagement often neglected in the discipline. Together, the chapters in this collection make the case that a renewal of the discipline and practice of psychology is a task that is best accomplished collectively and despite significant disagreements in solidarity. *Breaking Points* Neely Laurenzo Myers, 2024. A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. Unprecedented numbers of young people are in crisis today, and our health care systems are set up to fail them. *Breaking Points* explores the stories of a diverse group of American young adults experiencing psychiatric hospitalization for psychotic symptoms for the first time and documents

how patients and their families make decisions about treatment after their release Approximately half of young people refuse mental health care after their initial hospitalization even though we know that better outcomes depend on early support for youth and families In attempting to determine why this is the case Neely Laurenzo Myers identifies what matters most to young people in crisis passionately arguing that health care providers must attend not only to the medical and material dimensions of care but also to a patient's moral agency American Book Publishing Record, 2007 **Universalism without Uniformity** Julia L. Cassaniti, Usha Menon, 2017-10-26 One of the major questions of cultural psychology is how to take diversity seriously while acknowledging our shared humanity This collection edited by Julia L Cassaniti and Usha Menon brings together leading scholars in the field to reconsider that question and explore the complex mechanisms that connect culture and the human mind The contributors to *Universalism without Uniformity* offer tools for bridging silos that have historically separated anthropology's attention to culture and psychology's interest in universal mental processes Throughout they seek to answer intricate yet fundamental questions about why we are motivated to find meaning in everything around us and in turn how we constitute the cultural worlds we inhabit through our intentional involvement in them Laying bare entrenched disciplinary blind spots this book offers a trove of insights on issues such as morality emotional functioning and conceptions of the self across cultures Filled with impeccable empirical research coupled with broadly applicable theoretical reflections on taking psychological diversity seriously *Universalism without Uniformity* breaks new ground in the study of mind and culture *The Market in Mind* Mark Dennis Robinson, 2019-07-23 A critical examination of translational medicine when private risk is transferred to the public sector and university research teams become tech startups for global investors A global shift has secretly transformed science and medicine Starting in 2003 biomedical research in the West has been reshaped by the emergence of translational science and medicine the idea that the aim of research is to translate findings as quickly as possible into medical products In *The Market in Mind* Mark Dennis Robinson charts this shift arguing that the new research paradigm has turned university research teams into small biotechnology startups and their industry partners into early stage investment firms There is also a larger surprising consequence from this shift according to Robinson translational science and medicine enable biopharmaceutical firms as part of a broader financial strategy to outsource the riskiest parts of research to nonprofit universities Robinson examines the implications of this new configuration What happens for example when universities absorb unknown levels of risk Robinson argues that in the years since the global financial crisis translational science and medicine has brought about the financialization of health Robinson explores such topics as shareholder anxiety and industry retreat from Alzheimer's and depression research how laboratory research is understood as health innovation even when there is no product the emergence of investor networking events as crucial for viewing science in a market context and the place of patients in research decisions Although translational medicine justifies itself by the goal of relieving patients suffering Robinson finds patients' voices largely marginalized in translational neuroscience Fugues of
