Python for Kids brings Python to life and brings you and your parents into the world of programming. The ever-patient Jason R. Briggs will guide you through the basics as you experiment with unique and often hilarious example programs that feature ravenous monsters, secret agents, thieving ravens, and more. New terms are defined, code is colored, dissected, and explained, and quirky full-color illustrations keep things on the lighter side. Chapters end with programming puzzles designed to stretch your brain and strengthen your understanding. By the end of the book, you'll have programmed two complete games: a clone of the famous Pong and Mr. Stick Man Races for the Exit, a platform game with jumps, animation, and much more. As you strike out on your programming adventure, you'll learn how to use fundamental data structures like lists, tuples, and maps; organize and reuse your code with functions and modules; use control structures like loops and conditional statements; draw shapes and patterns with Python's turtle module; create games, animations, and other graphical wonders with tkinter. Why should serious adults have all the fun? Python for Kids is your ticket into the amazing world of computer programming. For kids ages 10 and their parents. *Lessons in Teaching Computing in Primary Schools* James Bird, Helen Caldwell, Peter Mayne, 2014-07-18. Lesson planning in line with the new Primary National Curriculum. This book goes much further than explaining to teachers the knowledge that the new computing curriculum requires. It is about teaching and learning rather than simply teaching computing as an academic subject. The new computing curriculum is explored in manageable chunks, and there is no scary language; everything is explained clearly and accessibly. You will find example lesson plans alongside every element of the curriculum as support and inspiration when planning your own lessons. It inspires an approach to teaching computing that is about creativity and encouraging learners to respond to challenges and problems using technology as a tool. Ideas for taking the lesson further, assessment, and reflective questions.
