laboratory and the human spirit offering a compassionate yet scientifically grounded guide to recovery Integrating neuroscience psychology and spirituality it reveals how addiction arises not from moral failure but from a complex interaction of neurochemical reward systems emotional wounds and existential disconnection Drawing equally on empirical research and lived experience this book maps the terrain of recovery as both a physiological recalibration and a spiritual reintegration It explores how ancient traditions modern psychology and post modern insight converge to form a comprehensive understanding of human healing Readers will discover how dopamine trauma and conditioning shape compulsive behavior and how awareness compassion and connection can transform it Written for those who seek clarity and practical tools as much as hope The Science and Spirituality of Addiction speaks to professionals thinkers and seekers alike By uniting science and soul it invites readers to integrate their fragmented selves and rediscover wholeness in a fractured world
