Practical R 4 Jon Westfall, 2021-05-14 Get started with an accelerated introduction to the R ecosystem programming language and tools including R script and RStudio This book teaches you how to get data into R and how to work with that data using R Once grounded in the fundamentals the rest of Practical R 4 dives into specific projects and examples starting with running and analyzing a survey using R and LimeSurvey Next you ll carry

out advanced statistical analysis using R and MouseLab Web. Then you'll see how R can work for you without statistics including how R can be used to automate data formatting, manipulation, reporting, and custom functions. The final part of this book discusses using R on a server; you'll build a script with R that can run an RStudio Server and monitor a report source for changes to alert the user when something has changed. This project includes both regular email alerting and push notification. And finally, you'll use R to create a customized daily rundown report of a person's most important information, such as a weather report, daily calendar, to-do's, and more. This demonstrates how to automate such a process so that every morning the user navigates to the same web page and gets the updated report.

What You Will Learn

- Set up and run an R script including installation on a new machine and downloading and configuring R.
- Turn any machine into a powerful data analytics platform accessible from anywhere with RStudio Server.
- Write basic R scripts and modify existing scripts to suit your own needs.
- Create basic HTML reports in R, inserting information as needed.
- Build a basic R package and distribute it.
