Technology Enhanced Assessment Desirée Joosten-ten Brinke,Mart Laanpere,2017-05-11 This book constitutes the proceedings of the 19th International Conference on Technology Enhanced Assessment TEA 2016 held in Tallinn Estonia in October 2016 The 16 full papers presented were carefully selected from 38 submissions They are centered around topics like measurement of higher order skills collaborative problem solving or presentation skills the development of guidelines for authentication control the role of self assessment **Handbook for Evaluating Knowledge-Based Systems** Leonard Adelman,Sharon L. Riedel,1997-04-30 Knowledge based systems are increasingly found in a wide variety of settings and this handbook has been written to meet a specific need in their widening use While there have been many successful applications of knowledge based systems some applications have failed because they never received the corrective feedback that evaluation provides for keeping development focused on the users needs in their actual working environment This handbook provides a conceptual framework and compendium of methods for performing evaluations of knowledge based systems during their development Its focus is on the users and subject matter experts evaluation of the usefulness of the system and not on the developers testing of the adequacy of the programming code The handbook permits evaluators to systematically answer the following kinds of questions Does the knowledge based system meet the users task requirements Is the system easy to use Is the knowledge base logically consistent Does it meet the required level of expertise Does the system improve performance The authors have produced a handbook that will serve two audiences a tool that can be used to create knowledge based systems practitioners developers and evaluators and a framework that will stimulate more research in the area academic researchers and students To accomplish this the handbook is built around a conceptual framework that integrates the different types of evaluations into the system of development process The kinds of questions that can be answered and the methods available for answering them will change throughout the system development life cycle And throughout this process one needs to know what can be done and what can t It is this dichotomy that addresses needs in both
