Written specifically for undergraduate students and novice researchers, this book has been designed as a lively and accessible guide to planning, conducting, and reporting research in the subject. It emphasises practical skills required in studying Criminology, the importance of criminological research, and places related methodology firmly in the context of students' broader study of the discipline. New to the second edition is a brand new section on research skills in Criminology, including detailed coverage of writing skills, referencing dissertations and research reports, presentation skills, and revision. The book also offers additional coverage of the politics of criminological research and the presentation of official crime statistics.
