Selecting Research Methods: Methods for analysing and reporting results W. Paul Vogt, 2008

Selecting Research Methods provides advice from prominent social scientists concerning the most crucial steps for planning and undertaking meaningful research selecting the methods to be used Contributors to the collection address methodological choices in four stages design sampling coding and measurement and analysis The volumes provide an integrated approach to methodological choice in two ways First the contributions range from the early decisions about design options through the concluding choices about analyzing interpreting and presenting results Second the collection is integrated because it addresses the needs of projects that collect qualitative evidence quantitative data or both Volume 1 concerns design choice the articles focus on selecting designs that are effective for answering research questions and achieving the goals of the researcher Volume 2 is on sampling and includes in addition to sampling from populations advice on choosing methods for recruiting informants for interviews selecting sites for participant observation and assigning subjects to control and experimental groups Volume 3 reviews options for coding and measurement it emphasizes methodological choices that enable researchers to study concepts in ways that enhance the reliability and validity of the research Finally the articles included in Volume 4 review the range of choices available among methods to analyze results and interpret the meanings of evidence

Brazilian Journal of Probability and Statistics ,1996

Bootstrap Methods Gerhard Dikta, Marsel Scheer, 2021-08-10 This book provides a compact introduction to the bootstrap method In addition to classical results on point estimation and test theory multivariate linear regression models and generalized linear models are covered in detail Special attention is given to the use of bootstrap procedures to perform goodness of fit tests to validate model or distributional assumptions In some cases new methods are presented here for the first time The text is motivated by practical examples and the implementations of the corresponding algorithms are always given directly in R in a comprehensible form Overall R is given great importance throughout Each chapter includes a section of exercises and for the more mathematically inclined readers concludes with rigorous proofs The intended audience is graduate students who already have a prior knowledge of probability theory and mathematical statistics
