The field of communications is increasingly recognized as a powerful tool in addressing the world's most imperative public health challenges. Effective communication in health campaigns can inform, empower, or persuade individuals to adopt healthier lifestyles as well as foster public debate and policy change. Featuring a full chapter on informatics, this book is devoted to the competencies in health communication and informatics recommended by the Association of Schools of Public Health. With chapter contributions from some of the leading experts in public health informatics and epidemiology, health communication and evaluation, *Essentials of Public Health Communications* introduces concepts and examples that will prepare students to enter a local health department, community organization, or government agency and contribute to health communication research, patient counseling, materials design, program management, and media relations. Written specifically for student use, this book presumes no prior knowledge of the health communication or the informatics fields. Concepts are presented in clear, jargon-free language with terms defined throughout.

**Key Features:** Rather than simply presenting theories and cases, this text emphasizes the framework and methods for breaking down complex tasks into steps for mastery. It simplifies key concepts in public health informatics and how data are transformed into useful information and effective presentations. It examines how health communication is actively being used by the leading public health agencies and organizations today. It includes suggested health communication projects that can be implemented at an academic institution or small-scale community level to enable hands-on learning. A companion website provides a complete package of instructor resources, including sample syllabi and curriculum guides for two semesters of instruction, as well as small-scale research projects.

*Public Health Communication* Claudia Parvanta, David E. Nelson, Richard N. Harner, 2017-03-22 Designed for master's level study, *Public Health Communication: Critical Tools and Strategies* will prepare new graduates for any entry-level position in public health policy, advocacy, health communication, health promotion, social marketing, or community health education. Filled with practical examples, the book is also a valuable resource for those preparing for the CPH or CHES exams. Students will learn core concepts for planning a communication framework, as well as key strategies for educating the public about health issues, including understanding and reporting science, communicating for policy and advocacy, and health literacy and numeracy. The book thoroughly explores classic theories of persuasion in communication, such as Extended
