Controllers in Web Dynpro:

Question 1: What are the types of Controllers in Web Dynpro ABAP?

The types of controllers are listed in the screenshot below:

Types of Controllers in webdynpro ABAP

Question 2: What is Component Controller?

Component Controller is the King of all Controllers. It is the backbone of your Web Dynpro Component . It is like a Global or Top Include for your program . It controls the entire activity of your Web Dynpro Component.

Question 3: What is an Interface Controller?

Whenever we want Views , nodes or methods of a particular web dynpro component to be available to other the outside world (i.e. other webdynpro components) , we make use of Interface controller . Interface Controller is created by default when a webdynpro component is created .Interface Controller would generally come into picture when you are doing component usage of some sort in web dynpro i.e. its using views/methods/nodes of one WD component in another.

Question 4: What is Custom Controller?

When your Component Controller grows big in size (say more than 10-15 views and corresponding context nodes , methods , events , event handlers etc) , it might become tough to handle everything in the Component Controller . In such a scenario , you can create one or more custom controllers and modularize or segregate the logic into separate parts using Custom Controller.

Question 5: Would you prefer creating multiple Custom Controllers OR would you go for separate Web Dynpro components and then do Component usage .

This would actually depend on the requirement , but ideally separate Web dynpro components should be created and reused. One can also use the assistance class for segregating business logic.

Question 6: How many component controllers can a Web Dynpro Component have ?

Component Controller is only one . You can create multiple controllers , but those are called Custom Controllers.

Note: If you are asked about the Web Dynpro architecture , you should talk about both the MVC framework and the controllers.

Question 7: Suppose your Web Dynpro has 10 nodes in the Component Context . Will all 10 the nodes be available in the Interface controller?

Nodes from the Component context are available to the interface controller only when the nodes are declared as interface nodes. To create an interface node , set the interface property to yes as shown in the screenshot below:

Interface Node in Webdynpro ABAP

To create an interface node , set the interface property to yes as shown in the screenshot to the right :

Once created , the interface node is indicated by a special symbol as shown in the figure below and the property Interface Node is set to yes.
