

MY MATHS DICTIONARY

Angles are formed by two rays that meet at a common point called the vertex. Angles are measured in degrees.

- Acute: The type of angle that is less than 90°.
- Right angle: The angle that is exactly 90°.
- Obtuse: An angle that is more than 90° but less than 180°.
- Reflex: An angle that is more than 180°.

Area: the amount of space covered by a shape. It is measured in squared units.

Average: the mean of a set of numbers.

Calculate: to find the answer to a problem.

Capacity: the amount of space that a container can hold. It is measured in litres or millilitres.

Century: the years between 100 and 100.

Divide: to split something into equal parts.

Degree: a unit of measurement for angles.

Difference: the amount of change between two numbers.

Equilateral: a triangle with three equal sides and three equal angles.

Factors: numbers that multiply together to give another number.

Inverse operations: operations that undo each other. For example, addition and subtraction are inverse operations.

Mean: The mean is a type of average. To find the mean, you need to add up all your results and then divide the total by the number of results.

Example: Here are a set of results of an exam: 50, 60 and 40.
 $50 + 60 + 40 = 150$ or then $150 \div 3 = 50$
The mean result is 50.

Median: when data is arranged in size order, the middle result is the median.

Mode: the most common result in data collected.

Multiple: a larger number that can be divided by smaller numbers added together. Example: 100 is a multiple of 10.

Percentages: this is written as % and it means 'out of 100'. 60% means the same as 60/100. To find 60% of 200, you divide 200 by 100 and then multiply by 60.

Prime numbers: this is a type of number that will divide itself and the number 1 only.

Prime numbers to 50 are: 2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47.

Unit cube: A cube that is 1 unit long and 1 unit wide and 1 unit high.

Volume: The amount of space that a 3D object takes up.

Venn diagram: a diagram that shows the relationship between two or more groups of things. The groups are represented by overlapping circles.

Whole number: a number that is not a fraction or a decimal.

X-axis: The horizontal axis on a graph.

Y-axis: The vertical axis on a graph.
