written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no
doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to
adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories not to decide what precisely are their
implications We are dependent upon the scientists for an exposition of those developments which so we find them
proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do
not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans
They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and
upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be
worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon
which these views are based **Shipbuilder** ,1919 The American Mathematical Monthly ,1921 **Monthly Record of**
