Counselling Skills Meena Hariharan, Usha Chivukula, Meera Padhy, 2024-03-13 The book professionalises counselling through the scientific application of appropriate knowledge and skills at various stages of the counselling process. With the aim of equipping readers with fundamental and advanced counselling skills, this book examines a range of key skills from various theories and models of counselling to enable students and professionals to understand the underlying techniques which need to be applied from the time the client approaches the counsellor until the conclusion of the counselling process. Sheds light on the complex psychological state of clients to discuss training for a holistic assessment in terms of emotions, cognition, motivation and behaviour. Presents extensive materials that train the students in skills to provide emotional relief to the client to help the client change from self-defeating negative thoughts to promising positive thinking, enhancing motivation and self-confidence to initiate action. Integrates discussions on case studies, live as well as hypothetical examples, traditional and contemporary theories on counselling with the art of communication. An invaluable guidebook on developing counselling skills, this volume will be of immense interest to students, researchers, teachers, professionals and practitioners of psychology, behavioural sciences, mental health, counselling and education.

Practicum and Internship Judith Scott, John C. Boylan, Christin M. Jungers, 2013-07-04 Completely revised and updated, the fourth edition of *Practicum and Internship* carries on the tradition of the previous editions as a popular and highly useful textbook and resource guide. It continues to be a comprehensive resource for students and their supervisors throughout the counseling and psychotherapy process, providing thorough coverage of both the theoretical and practical aspects of the practicum and internship process. This text guides students through the important pre-professional training experiences from the selection of an appropriate practicum site to the final evaluation of the internship. Organizing the content into four sections for clarity and ease of use, the authors discuss all the relevant information regarding the practicum experience, preparation for the internship, the internship experience and evaluation, and important ethical and legal considerations. New in this edition are a listing and description of the various counseling theories and techniques, a section on crisis intervention and response, detailed guidelines for school mental health consultation, and forms for evaluating performance, cognitive and consulting skills. Forms are provided at the end of the book for the student's use in site selection, assessment, client treatment, and performance feedback and evaluation. These forms are also included in electronic format on an accompanying CD to allow students to modify and reuse them.
